Analyzing Urban Poverty Judy Baker, 2004 In recent years an extensive body of literature has emerged on the definition measurement and analysis of poverty Much of this literature focuses on analyzing poverty at the national level or spatial disaggregation by general categories of urban or rural areas with adjustments made for regional price differentials Yet for an individual city attempting to tackle the problems of urban poverty this level of aggregation is not sufficient for answering specific questions such as where the poor are located in the city whether there are differences between poor areas if access to services varies by subgroup whether specific programs are reaching the poorest and how to design effective poverty reduction programs and policies Answering these questions is critical particularly for large sprawling cities with highly diverse populations and growing problems of urban poverty Understanding urban poverty presents a set of issues distinct from general poverty analysis and thus may require additional tools and techniques Baker and Schuler summarize the main issues in conducting urban poverty analysis with a focus on presenting a sample of case studies from urban areas that were implemented by a number of different agencies using a range of analytical approaches for studying urban poverty Specific conclusions regarding design and analysis data timing cost and implementation issues are discussed This paper a product of the Urban Unit Transport and Urban Development Department is part of a larger effort in the department to promote strategies for reducing urban poverty World Bank web site

Open Cities | Open Data Scott Hawken, Hoon Han, Chris Pettit, 2019-09-26 Today the world's largest economies and corporations trade in data and its products to generate value in new disruptive markets Within these markets vast streams of data are often inaccessible or untapped and controlled by powerful monopolies Counter to this exclusive use of data is a promising world wide open data movement promoting freely accessible information to share reuse and redistribute The provision and application of open data has enormous potential to transform exclusive technocratic smart cities into inclusive and responsive open cities This book argues that those who contribute urban data should benefit from its production Like the city itself the information landscape is a public asset produced through collective effort attention and resources People produce data through their engagement with the city creating digital footprints through social media mobility applications and city sensors By opening up data there is potential to generate greater value by supporting unforeseen collaborations spontaneous urban innovations and solutions and improved decision making insights Yet achieving more open cities is made challenging

by conflicting desires for urban anonymity sociability privacy and transparency This book engages with these issues through a variety of critical perspectives and presents strategies tools and case studies that enable this transformation **Local Governance and Poverty in Developing Nations** Nicky Pouw,Isa Baud,2013-06-17 This volume examines the persistence of poverty both rural and urban in developing countries and the response of local governments to the problem exploring the roles of governments NGOs and CSOs in national and sub national agenda setting policy making and poverty reduction strategies It brings together a rich variety of in depth country and international studies based on a combination of original data collection and extensive research experience in developing countries Taking a bottom up and multi dimensional perspective of poverty and well being as the starting point the authors develop a convincing set of arguments for putting the priorities of poor people first on any development agenda thus carving out an undisputable role for local governance in interplay with higher up governance actors and institutions Urban Ecology Richard T. T. Forman,2014-02-13 The first richly illustrated worldwide portrayal of urban ecology tying together organisms built structures and the physical environment around cities *Geospatial Techniques in Urban Hazard and Disaster Analysis* Pamela S. Showalter,Yongmei Lu,2009-11-11 This book is the second in a series that examines how geographic information technologies GIT are being implemented to improve our understanding of a variety of hazard and disaster situations The main types of technologies covered under the umbrella of GIT as used in this volume are geographic information systems remote sensing not including ground penetrating or underwater systems and global positioning systems Our focus is on urban areas broadly defined in order to encompass rapidly growing and densely populated areas that may not be considered urban in the conventional sense The material presented here is also unabashedly applied our goal is to provide GIT tools to those seeking more efficient ways to respond to recover from mitigate prevent and or model hazard and disaster events in urban settings Therefore this book was created not only with our colleagues in the academic world in mind but also for hazards professionals and practitioners We also believe graduate students will find the material presented here of interest as may upper division undergraduate students *Advanced Studies in Energy Efficiency and Built Environment for Developing Countries* Chaham Alalouch,Hassan Abdalla,Emmanuel Bozonnet,George Elvin,Oscar Carracedo,2019-05-21 This edited volume consists of three parts It is a culmination of selected research papers presented at the second version of the international conference on Improving Sustainability Concept in Developing Countries ISCDC and the second version of the international conference on Alternative and Renewable Energy Quest in Architecture and Urbanism AREQ organized by IEREK in Egypt 2017 It discusses major environmental issues and challenges which threaten our future These include climate change impact environmental deterioration increasing demand for energy and new approaches for alternative renewable energy sources which became a necessity for survival In addition to addressing the different environmental issues witnessed today research presented in this book stressed on the need of sustainably shaping buildings and cities using renewable energy sources Topics included in this

book are 1 Resilience in the Built Environment 2 Design for energy efficient architecture and 3 Alternative and Renewable Energy Resources Quest in Architecture and Urbanism The book is of interest to researchers and academicians who continuously aim to update their knowledge in these fields as well as decision makers needing the enough knowledge to carry out the right decisions towards the benefit of the environment and society **Slums of the World** Eduardo López Moreno,2003
