It provides learners with the necessary skills and knowledge through practice experience and applications in day-to-day business. It has been developed as per the latest syllabus and examination pattern prescribed by the CBSE. The retail industry is one of the fastest growing industries in the skill sector. The entry of many small and large stores has increased the demand for skilled and trained retail professionals for various job roles such as store operation assistant, trainee, associate, sales associate, etc. The objectives of this job role are to deliver products and services to the customers, maintain sufficient stock levels, sustain health and safety, and work effectively in a team as well as in the organisation. Consumers have become more aware of the practices in the retail sector as a result of the development of modern merchandising strategies and the establishment of large retail companies. Experiential learning stresses on the learning methodology for the individual. Thus the learning activities are student-oriented rather than teacher-oriented. In this book, students will learn about introduction to retailing, receiving and storing goods, stock level in storage, and how to deliver excellent customer service. Salient Features of this Book: This book adopts a simplified method of presenting the ideas, keeping the needs and expectations of the students and teachers in mind as laid down in the syllabus. This book is divided into two parts: Part A deals with the Employability Skills with chapters on the units Communication Skills I, Self Management Skills I, ICT Skills I, Entrepreneurial Skills I, and Green Skills I. Part B, which deals with the Subject Specific Skills, comprises of four units. Each unit has four sessions. The first unit focuses on the introduction of retailing. The second unit explains the procedure of receiving and storing of goods. The third unit discusses the stock levels in retail stores, and the fourth unit describes how to deliver excellent customer service. This book is learner-centred with a comprehensive approach. Every session in each unit has its accompanying activity and practical exercises. Also, each unit ends with a self-assessment consisting of multiple choice questions, short answer, and long

answer questions that help in assessing the students learning The learning objectives at the beginning of each unit describe a direction for the student to acquire new skills knowledge and attitudes Fascinating pictures related to the topics are given We hope that this book will help learners understand retail concepts and scenarios allowing them to become successful retail professionals Any suggestions for further improvement of the book will be most welcomed We wish the readers all the best in their career Authors

A Textbook of Artificial Intelligence for Class IX (A.Y. 2023-24)Onward Hema

Dhingra,2023-05-20 The term artificial intelligence may sound intimidating to some but it has been in use for decades and its applications are more common than you might imagine It is gaining the spotlight across applications in our personal and professional lives AI is still at a relatively early stage of development so that the range of potential applications have ample scope left for further development It holds the promise of solving some of the most pressing issues facing society but also presents challenges such as unethical use of data and potential job displacement There are so many amazing ways artificial intelligence and machine learning are used behind the scenes to impact our everyday lives AI assists in every area of our lives whether we re trying to read our emails get driving directions get music or movie recommendations AI is a constellation of technologies that enable machines to act with higher levels of intelligence and emulate the human capabilities of sense comprehend and act AI is not specifically related to computer science This is a field of study that encompasses human behaviour biology psychology and even language and linguistics AI presents opportunities to complement and supplement human intelligence and enrich the way people live and work Artificial Intelligence is being widely recognized to be the power that will fuel this future global digital economy Countries around the world are becoming increasingly aware of the potential benefits of developing and applying AI From SIRI to self driving cars artificial intelligence AI is progressing rapidly While science fiction often portrays AI as robots with human like characteristics AI can encompass anything from Google s search algorithms to IBM s Watson to autonomous weapons From Amazon shopping recommendations Facebook image recognition and personal assistants like Siri Cortana and Alexa your phone is becoming a portal to real world applications of artificial intelligence This book is a glimpse into the future that illustrates how AI will continue to transform our daily lives in the near future Digitalisation and the new technological possibilities that artificial intelligence AI brings are driving the biggest social and economic changes since the industrial revolution Without the right political economic and ethical framework conditions there is a risk of uncontrolled development and a negative impact of AI Artificial intelligence AI is doing a lot of good and will continue to provide many benefits for our modern world but along with the good there will inevitably be negative consequences The sooner we begin to contemplate what those might be the better equipped we will be to mitigate and manage the dangers While writing the book we have tried to keep the explanation simple with lots of examples and illustrations Lastly there is always a scope of improvement Thus it is a request to our esteemed readers to send the feedback and suggestions etc for the improvement of the book All your requests are welcome
