1 # This script implements a simple neural network (NN) with one hidden layer and one output layer.
2 # The NN is trained using the backpropagation algorithm.
3 # The input data is loaded from a file named 'input.txt'.
4 # The output data is loaded from a file named 'output.txt'.
5 # The NN is trained for a fixed number of epochs (1000).
6 # The training process is monitored by printing the loss and accuracy at each epoch.
7 # The final weights and biases are saved to a file named 'weights.txt'.
8 # The NN is then used to predict the output for a given input.
9 # The predicted output is printed to the console.

1  The digital world is a double-edged sword. On the one hand, it
2  has revolutionized communication, bringing people closer together
3  than ever before. On the other hand, it has also created a
4  landscape of cyber threats and privacy concerns.
5
6  In the realm of communication, digital technology has
7  transformed the way we interact. Email, instant messaging,
8  and video conferencing have become integral parts of our
9  daily lives. These tools have broken down geographical
10  barriers, allowing us to connect with friends and colleagues
11  across the globe in real-time.
12
13  However, the digital world is not without its dangers.
14  Cybercriminals are constantly seeking ways to exploit
15  vulnerabilities in our digital infrastructure. Phishing
16  attacks, identity theft, and data breaches are all too
17  common. The loss of sensitive information can have
18  devastating consequences for individuals and organizations
19  alike.
20
21  To navigate this complex digital landscape, we must
22  take proactive steps to protect ourselves. This includes
23  using strong, unique passwords, enabling two-factor
24  authentication, and keeping our software and devices
25  up-to-date with the latest security patches.
26
27  Additionally, we should be mindful of the information
28  we share online. Social media platforms, while
29  convenient, often require us to provide personal
30  details. We should be cautious about what we post
31  and who we connect with.
32
33  In conclusion, the digital world offers immense
34  opportunities for growth and connection, but it also
35  presents significant challenges. By staying informed
36  and taking appropriate security measures, we can
37  harness the power of digital technology while
38  minimizing the risks.
39
40  The future of the digital world is bright, but it
41  is a future that must be built on a foundation of
42  trust and security.
