Answers For Experimenting With Confederation:

Canadian Federalist Experiment Frederick Vaughan, 2003-05-12 He then argues that Trudeau's 1982 Charter quietly undermined the monarchic character of the constitution by introducing republican principles of government. The result has been old institutional structures at odds with the republican ambitions leaving Canada clinging to the wreckage of the old aristocratic order while attempting to provide a new order founded on republican equality. Vaughan shows how at the time of Confederation Edward Freeman, a Cambridge historian who convinced John A. Macdonald to experiment with what no one had ever heard of before, a monarchic federation, and Jean Louis DeLoime, a popular French authority on the English constitution, helped forge a new federal constitution with a strong central government and a chief executive armed with the powers necessary to govern. Vaughan examines how these principles were undermined by the judicial activism of the Judicial Committee of the Privy Council which paved the way for the significant expansion of judicial power under the Charter since 1982.

The 7 full papers presented together with 3 short papers in this volume were carefully reviewed and selected from 14 submissions. This year the contributions addressed the following challenges: authorship attribution, fake news detection, and news tracking, noise detection in automatically transferred relevance judgments, impact of online education on children's conversational search behavior, analysis of multi-modal social media content, knowledge graphs for sensitivity identification, a fusion of deep learning and logic rules for sentiment analysis, medical concept normalization, and domain-specific information extraction. In addition to this, the volume presents 7 best-of-the-labs papers which were reviewed as full paper submissions with the same review criteria. 14 lab overview papers were accepted and represent scientific challenges based on new datasets and real-world problems in multimodal and multilingual information access.

Doctor Ox's Experiment and Other Short Stories Jules Verne, 2015-10-19 Doctor Ox's Experiment and Other Short Stories by Jules Verne. Jules Verne pioneered the genre of science fiction. He is best known for his novels Journey to the Center of the Earth (1864), Twenty Thousand Leagues Under the Sea (1870), and Around the World in Eighty Days (1873). Verne wrote about space, air, and underwater travel before navigable aircraft and practical submarines were invented and before any means of space travel had been devised. He is the third most translated author of all time. His prominent novels have been made into films. Verne, along with H. G. Wells, is often referred to as the Father of Science Fiction. And this is a nice collection with ten of his short stories.
