the forefront of electric vehicle adoption and a wave of Chinese manufactured cars is now hitting Europe and the West As the world s largest car producer since 2008 China s automotive industry deserves a closer look *Driving the Dragon* explores the history of Chinese car manufacture looking at some of the important cars on that journey the false starts and missed opportunities The story begins with the Rover 75 and how it played a key role in moving the Chinese car industry forward It concludes with a look at cars from the likes of BYD Zeekr and Nio which are becoming mainstream in the UK and Europe as some of the most competitive electric vehicles on the market not just in terms of price but also performance and desirability For many people China is still a very enigmatic country not helped by recent political events While the book focuses on the automotive industry it also looks at the country itself and examines the culture surrounding the industry The author spent 30 years in China teaching test driving and reviewing Chinese cars and writing while witnessing first hand the extraordinary growth of the Chinese car industry Cincinnati Magazine ,2008-02 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region
