Sports Training Dr. A. K. Uppal, 2020-09-03 To develop the physical education culture it is essential the concept of sports training should be familiar to physical education teachers and coaches Knowing the principles of sports training alone is not enough teachers and coaches should be well versed with the methods and means of sports training so that this knowledge can be successfully applied on the field The personality and professional knowledge of the coach teacher trainer or instructor play a crucial part in the quality of sports training implemented Therefore to meet this principle the coach must be able to integrate pieces of knowledge across the fields like anatomy physiology biomechanics psychology sociology theory of motor learning and didactics The subject of sports training is highly dynamic in nature As a result of constant research new knowledge is being evolved which in turn can be effectively utilized to enable sports persons to enhance their performance capacity and readiness of performance I hope the book Sports Training which is based on my earlier books Science of Sports Training and Principles of Sports Training would provide latest scientific knowledge to the physical education students and teachers The book is written for the students of physical education courses which are based on the prescribed syllabus of NCTE The purpose to the book is to provide relevant text for the students and to lay the framework for a discussion of the relative significance of a sports training The presentation of the book is simple and language is very fluent and easy to understand I am sure that the content of the book will not only be useful for the students of physical education but also for researchers teachers and for those who are really interested to know about it

Training for Sports Walter Camp, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1921 edition Excerpt APPENDIX The exercises which I am here appending have been referred to a number of times in the course of this book and have been advocated as profitable adjuncts to training for all of the sports The Daily Dozen were originally designed as a method of good rapid all round conditioning of naval recruits for the hard work ahead of them They were used instead of the Swedish and other methods which had formerly been tried out because they were less fatiguing and tended to develop the main muscles of the body instead of concentrating on the arms and legs I am giving them here in the form in which they were given at the naval training stations during the war This form presupposes the presence of a leader whose movements are followed by a class Such classes have been organized in schools and colleges and have proved very useful but the exercises can easily be done individually in one's bedroom or other convenient place by simply following the directions assisted by the cuts THE DAILY DOZEN SET UP The Daily Dozen Set Up consists of twelve exercises which for ease in memorizing are divided into four groups of three exercises each Each exercise or movement is given a name and the names of all the movements of a group commence with the same letter thus 3 Head S Gkasp 3 Crouch 3 Wing These exercises are not difficult or exhausting and do not demand great strength for proper execution but they are designed both from a scientific and a
