Mayer, 2007-10-23 Light is all around us Vision is our dominant sense and we are richly rewarded with a palette of colors from red to violet Our eyes do not detect the low energy long wavelength infrared IR radiation but we know it exists from discussions of war applications and televised images of guided weapons targets Our eyes do not detect the higher energy above visible light energies and shorter than visible wavelength ultraviolet radiation and yet we know it is there from the sunburn we receive in Arizona We also know that window glass can block ultraviolet rays so we don't get a burn while driving with the windows rolled up We know about radio waves from the little boxes that talk to us and x rays from the dentist office These waves and rays belong to the same family of light often called photons from the Greek photo light that describes the spectra of electromagnetic radiation over 10 orders of magnitude from very low energy radio waves to very high energy x rays and gamma rays
