 - What status is the IP configuration? Show?

The status really indicates whether the IP address is configured using the binary command or by DHCP. This will be either `static` or `dhcp` (or `dhcp`).

 - How do you know?

This means that we changed the IP address from the DHCP configuration to a static configuration that we set manually. That is, the status is `static` and that is the status.

 - What status information is displayed?

The output of IP address, subnet mask and status gateway.

- 3. Your routing table will show:

 - What is the total table?

The number is 1000000000.

 - What is the IP address of the router?

It should be something like 10.10.10.1.

 - What is the IP address of your DHCP server?

10.10.10.1 is the address.

- 4. Your routing table shows that the host routing table of the router and the output of the command `show ip route` are the same and that the output is the same.
- 5. Your routing table will show:

 - What does the output show?

The output of the command `show ip route` shows the output.
- 6. Your routing table will show:

 - What does the output show?
