The Real Analysis Lifesaver Raffi Grinberg, 2017-01-10 The essential lifesaver that every student of real analysis needs Real analysis is difficult For most students in addition to learning new material about real numbers topology and sequences they are also learning to read and write rigorous proofs for the first time The Real Analysis Lifesaver is an innovative guide that helps students through their first real analysis course while giving them the solid foundation they need for further study in proof based math Rather than presenting polished proofs with no explanation of how they were devised The Real Analysis Lifesaver takes a two step approach first showing students how to work backwards to solve the crux of the problem then showing them how to write it up formally It takes the time to provide plenty of examples as well as guided fill in the blanks exercises to solidify understanding Newcomers to real analysis can feel like they are drowning in new symbols concepts and an entirely new way of thinking about math Inspired by the popular Calculus Lifesaver this book is refreshingly straightforward and full of clear explanations pictures and humor It is the lifesaver that every drowning student needs The essential lifesaver companion for any course in real analysis Clear humorous and easy to read style Teaches students not just what the proofs are but how to do them in more than 40 worked out examples Every new definition is accompanied by examples and important clarifications Features more than 20 fill in the blanks exercises to help internalize proof techniques Tried and tested in the classroom
