

2. Suppose that in a large population, the distribution of heights of adult males is approximately normal with mean $\mu = 70$ inches and standard deviation $\sigma = 3$ inches. The histogram below shows the sample distribution of heights of a random sample of 100 individuals selected from the sample, and the sample mean is less than the sample mean is equal to the population mean height of all adult males. What measure do you use to quantify the variability of such a random sample of the population using the data from the sample and denote the measure as s^2 .

- ☐ standard error = 0.096
☐ mean squared error = 0.125
☐ standard deviation = 0.15
☐ standard deviation = 0.477
☒ standard error = 0.477

✓ Answer

The question refers to the following sampling distribution: calculate the sampling variability of the mean: the standard error, as $SE = \sigma / \sqrt{n}$.

The quantity resulting in the sample mean by calculating the standard error of the mean $SE = \sigma / \sqrt{n}$, in this case use the population standard deviation (population standard deviation) to calculate the standard error of the mean. The value is 0.477, as $SE = \sigma / \sqrt{n} = 3 / \sqrt{100} = 0.477$.

3. Which of the following is false?

- ☐ Standard error is computed based on a normal distribution and always is lower than the standard deviation of the sample.
☐ As the sample size increases, the variability of the sampling distribution decreases.
☒ Standard error measures the variability in means of samples of the population taken from the same population.
☐ Standard error is the standard error of the mean, standard error of the standard deviation.

✗ Answer

The question refers to the following sampling distribution: calculate the sampling variability of the mean: the standard error, as $SE = \sigma / \sqrt{n}$.

This is the definition of the standard error.

Study Guide and Student Solutions Manual for Use with Statistics John Banks, Robert K. Smidt, Donald H. Sanders, 1999-11 The main difference between this text and many others is that an attempt is made here to present material in a rather relaxed and informal way without omitting important concepts The text demonstrates the wide range of relevant issues and questions that can be addressed with the help of statistical analysis techniques by presenting over 1 750 realistic problems that arise often in health care the social and physical sciences education business and economics engineering and leisure activities It also convinces your students that statistics is doable by including real data

that students have collected and analyzed for class assignments and projects Additionally the text utilizes an intuitive common sense approach including occasional humorous situation or ridiculous name to develop concepts whenever possible Statistics A First Course employs widely available inexpensive technologies particularly Minitab and the TI 83 graphing calculator We also explore the use of the World Wide Web to collect data providing students with the means to obtain up to date information without leaving their desks In short this book is written to communicate with students rather than to lecture to them and its intent is to convince readers that the study of statistics can be a lively interesting and rewarding experience
