Analyzing Race Talk Harry van den Berg, Margaret Wetherell, Hanneke Houtkoop-Steenstra, 2003 The interview is one of the most important sources of social scientific data yet there has been relatively little exploration of the way interviews are conducted and interpreted By asking internationally respected scholars from a range of traditions in discourse studies including conversation analysis discursive psychology and sociolinguistics to respond to the same material this exciting new book sheds light on some key differences in methodology and theoretical perspective Key topics are addressed such as the forms of knowledge produced in interviews the interview as social interaction and the foundations for the study of talk and texts in qualitative research The use of interviews exploring attitudes to race further broadens the scope of the book enabling the contributors to explore sensitive issues around the construction and interpretation of interviews on controversial topics and specifically on issues for race and ethnicity *Rigorous Data Analysis* Wolff-Michael

Roth, 2015-02-28 In qualitative research one can often hear the statement that research results are just social constructions In criminal cases and in court hearings we tend to expect that the true sequence of events has to be found rather than just any story Here the author shows that qualitative social research can be conducted in the manner of police work or court proceedings He does so by exhibiting how short pieces of transcriptions can be approached to uncover who when where and how participated what kind of social situation produced the transcription and so on without any background knowledge other than that talk itself Commenting on transcriptions of a researcher in the course of doing rigorous data analysis readers learn
