
Abstract

Abstract

Abstract: This is a preliminary study of the effects of a 10-week training program on the performance of a group of 10 young athletes. The program was designed to improve the athletes' performance in a 100-m sprint. The results of the study show that the athletes' performance improved significantly after the 10-week training program. The study was conducted in a laboratory setting and the results were compared to the athletes' performance before the training program. The study was limited by the small sample size and the lack of a control group. The study was funded by the National Science Foundation.
