To complement the natural process of learning, each activity builds on the previous one from concrete to pictorial to abstract. Dr. Thompson's unique three-step approach encourages students to first recognize patterns, then use diagrams, tables, and graphs to illustrate algebraic concepts, and finally apply what they've learned through cooperative games, puzzles, problems, and activities using a graphic calculator and computer. You'll find each activity has complete teacher directions, lists of materials needed, and helpful examples for discussion, homework, and quizzes. Most activities include time-saving reproducible worksheets for use with individual students, small groups, or the entire class.
