On Turtles and Dragons and the Dangerous Quest for a Media Art Notation System (version 1.2) The Contributors, 2013-04-22 This book arose as an attempt to collect and collate ideas and problems around notation that many of us have been dealing with on several levels We have processes of varying complexity we would like to work out ways to discuss them that move beyond the dichotomy of hand waving or looking at the deepest level of code We had many questions In an interactive situation how do we discuss the possibilities for interaction and the way a media should be playing given the actions of visitors How do we investigate the inner workings of an experience to see whether it makes sense without building it completely in advance We want to think of notation as an abstraction a simplification and intuitive or studied way of writing something down that succinctly summarises

the important points of a given situation process object or system This book and its ideas should help us think discuss design build analyse and document the systems
