

Digestive System

The digestive system starts at the mouth. You will trace the organs all the way to the anus and identify each on the worm.

Find the mouth opening, the first part after the mouth is the pharynx, you will see stringy things attached to either side of the pharynx (pharyngeal muscles) ☐. The esophagus leads from the pharynx but you probably won't be able to see it, since it lies underneath the heart ☐. You will find a two structures close to the clitellum. First in the order is the crop ☐, followed by the gizzard ☐. The gizzard leads to the intestine ☐ which is as long as the worm and ends at the anus ☐.

*Use your scissors to cut open the crop and the gizzard. Which one has the harder exterior? ☐ _____

Nervous System

Locate the brain at the far anterior region of the worm. It is very tiny and whitish colored. If you can't find it, it is probably because it was destroyed when you cut the worm. You CAN locate the ventral nerve cord by removing the intestines and searching for a white string-like structure that runs the length of the worm and attaches to the brain. Remove the intestines and locate the ventral nerve cord. ☐
