of objects of study and hence to ensure transparency and ultimate credibility of the findings Moreover the contributors come from diverse backgrounds including authors from the former Yugoslavia and others who have made their way to the region after starting their research careers some from universities in the area others from institutions in the Global North Here they explore cross cutting issues such as the repercussions of gender nationality institutional affiliation and the consequences of their entry into the field This is examined in terms of the results of the research and the ethical aspect of the relationship with the object of study as well as the implications of the chosen time framework in the methodological design and the clash between this decision and the interests of the actors studied
