Digital Transformation of the Economy: Challenges, Trends and New Opportunities Svetlana Ashmarina,Anabela Mesquita,Marek Vochozka,2019-02-05 This book gathers the best

contributions from the conference Digital Transformation of the Economy Challenges Trends and New Opportunities which took place in Samara Russian Federation on May 29-31, 2018. Organized by Samara State University of Economics, Samara, Russia, the conference was devoted to issues of the digital economy. Presenting international research on the impact of digitalization on economic development, it includes topics such as the transformation of the institutional environment under the influence of informatization, the comparative analysis of the digitalization development in different countries, and modeling the dependence of the rate of change in the economy on the level of the digitalization penetration into various spheres of human activity. It also covers business process transformation in the context of digitalization and changes in the structure of employment and personnel training for the digital economy. Lastly, it addresses the issue of ensuring information security and dealing with information risks for both individual enterprises and national economies as a whole. The book appeals to both students and researchers whose interests include the development of the digital economy as well as to managers and professionals who integrate digital solutions into real world business practice.

Global Crises, Global Solutions Bjørn Lomborg, 2004-10-25. A unique publication exploring the opportunities for addressing ten of the most serious challenges facing the world today: Climate Change, Communicable Diseases, Conflicts, Education, Financial Instability, Corruption, Migration, Malnutrition, and Hunger, Trade Barriers, Access to Water. In a world fraught with problems and challenges, we need to gauge how to achieve the greatest good with our money. *Global Crises, Global Solutions* provides a rich set of arguments and data for prioritising our response most effectively. Each problem is introduced by a world renowned expert defining the scale of the problem and describing the costs and benefits of a range of policy options to improve the situation. Each challenge is evaluated by economists from North America, Europe, and China who attempt a ranking of the most promising options. Whether you agree or disagree with the analysis or conclusions, *Global Crises, Global Solutions* provides a serious yet accessible springboard for debate and discussion.

Challenges and Solutions in Forecasting and Decision-Making in Marine Economy and Management Xuemei Li, Kevin Li, Junjie Wang, Song Ding, 2025-08-11. The marine economy and management pertain to the sustainable utilization of marine resources through internal and external coordination across departments with a focus on maximizing social and economic benefits. However, the persistence of activities such as overfishing, offshore oil spills, and excessive coastal development has led to escalating issues like offshore eutrophication, ocean acidification, warming, and marine plastic pollution, posing significant threats to marine sustainability. In alignment with the United Nations Sustainable Development Goal 14, substantial progress has been achieved by ocean management researchers in analyzing fishery resource management, optimization of marine industrial structures, development of marine energy, and adaptation of marine climate change. These studies hold crucial theoretical significance and practical value for understanding the state of the marine economy, guiding management practices, ensuring marine ecological security, and fostering sustainable ocean development.
