Handbook of Children's Rights Martin D. Ruck, Michele Peterson-Badali, Michael Freeman, 2016-12-08 While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children's rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults In addition there has been a noticeable shift in orientation from a focus on children's protection and provision to an emphasis on children's participation and self determination With contributions from a wide range of international scholars the Handbook of Children's Rights brings together research theory and practice from diverse perspectives on children's rights This volume constitutes a comprehensive treatment of critical perspectives concerning children's rights in their various forms Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights including the best interests of the child evolving capacities of the child states rights versus children's rights rights of children versus parental or family rights children as citizens children's rights versus children's responsibilities and balancing protection and participation In addition to its multidisciplinary focus the handbook includes perspectives from social science domains in which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches e.g childhood studies developmental psychology sociology of childhood anthropology and political science The handbook also brings together diverse methodological approaches to the study of children's rights including both quantitative and qualitative perspectives and policy analysis This comprehensive cosmopolitan and timely volume serves as an important reference for both scholarly and policy driven interest in the voices and perspectives of children and youth

International Society on Family Law. World Conference,2003-04-10 Papers from the 10th International Society of Family Law
Conference covering the resolution of disputes and current pressures on family law Children and International Human
Rights Law Aisling Parkes,2013-08-15 The United Nations Convention on the Rights of the Child 1989 is one of the most
highly ratified human rights treaties in the world with 192 states currently signed up to it Article Twelve is fundamental to
the Convention and states that all children capable of forming views have the right to express those views and recognises
that all children have the right to be heard in any judicial and administrative proceedings affecting them This book explores
the historical and theoretical background to Article Twelve and examines the various models of participation which have
been created to facilitate a better understanding of this provision Aisling Parkes analyzes the extent to which Article Twelve
has been implemented under international law and in domestic law as well as setting out recommendations for the most
effective ways of implementing Article Twelve in all areas of children s lives **Encyclopedia of Human Rights** Edward H.
Lawson,1996 Preface to the first edition Cluster Munition Monitor 2010 , **The State of the World's Children 2002**
Carol Bellamy,UNICEF.,2001 The theme of leadership in this publication is related to the role of governments and
international institutions in protecting the well being of children It is in three sections the first birth and broken promises
contrasts the reality of the life of a child born eleven years ago with the promises made at the World Summit for Children
held in New York in 1990 The section to change the world with children looks at the way UNICEF has called attention to the
plight of children The last section actions that can change the world concludes that investing in children is the best
investment a country can make and that no country has made a leap to sustainable development without investing
significantly in its children
