Military Review ,2019 The Search for Security in Post-Taliban Afghanistan Cyrus Hodes,Mark

Sedra,2013-05-13 By the middle of 2007 Afghans had become increasingly disillusioned with a state building process that had failed to deliver the peace dividend that they were promised For many Afghans the most noticeable change in their lives since the fall of the Taliban has been an acute deterioration in security conditions Whether it is predatory warlords the Taliban led insurgency the burgeoning narcotics trade or general criminality the threats to the security and stability of Afghanistan are manifold The response to those threats both in terms of the international military intervention and the donor supported process to rebuild the security architecture of the Afghan state known as security sector reform SSR has been largely insufficient to address the task at hand NATO has struggled to find the troops and equipment it requires to complete its Afghan mission and the SSR process from its outset has been severely under resourced and poorly directed Compounding these problems rampant corruption and factionalism in the Afghan government particularly in the security institutions have served as major impediments to reform and a driver of insecurity This paper charts the evolution of the security environment in Afghanistan since the fall of the Taliban assessing both the causes of insecurity and the responses to them Through this analysis it offers some suggestions on how to tackle Afghanistan s growing security crisis *Telecommunications Reform in India* Rafiq Dossani,2002-05-30 Telecommunications reform in India is complete according to policymakers there They have done everything correctly in their efforts to transform a state run monopoly into an independently regulated sector in which private companies compete with government owned and operated providers And yet India lags behind nations whose telecom sectors provided comparable levels of service a decade ago What went wrong Dossani and his contributors argue that the classic textbook solutions are insufficient to produce a healthy telecom industry in India which needs to improve regulatory design introduce competition in a single phase instead of gradually implement innovative funding models and choose appropriate technologies in order to improve access to universal service Containing valuable lessons for the telecommunications industries in Mexico Indonesia the Philippines and other countries taking formerly state run industries private this book constitutes a valuable resource for policymakers regulators practitioners scholars and overseas investors Policymakers and regulators will learn that cookie cutter solutions derived from rich country experience do not always work in countries that are poor yet democratic and pro market Practitioners will be interested in the sections on universal service technology convergence and the implications for reducing costs and improving the quality of both basic telephone services and IT enabled services In particular Indian technology workers in Silicon Valley should find this book indispensable Investors will gain valuable knowledge about this potentially huge market Scholars preconceived ideas may be nudged aside as their knowledge base is enhanced and their research agenda expanded Whereas some of the book s conclusions support current thinking such as the need to begin a sequence of reform with a regulatory system in place and the need for dominant

carrier regulation other conclusions challenge the conventional wisdom Contributors make a cogent case for reformulating the balance of power between regulators and policymakers introducing competition at the local level rather than through large franchises and replacing public subsidies with cross subsidies of universal service Provides a multidisciplinary approach to understanding the problems of telecommunications reform in all their complexity Broadcasting Cable Yearbook ,1989 **The International Encyclopedia of Education** Torsten Husén,T. Neville Postlethwaite,1994 Kenya Telephone Directory ,2008 Broadcasting Cablecasting Yearbook ,1988 *The Broadcasting Yearbook* ,1991 *Television & Cable Factbook* ,1999 **Pike & Fischer Shipping Regulation: Current service** ,1961
