The Report: Nigeria 2016 Oxford Business Group, 2016-10-06

Nigeria is the largest economy in Africa with a GDP of 487bn in 2015 according to the World Bank. The country asserted the mantle of the continent's largest economy in 2013 following a rebasing exercise. However, its large population means that Nigeria remains a comparatively poor country in per capita terms with a lower GDP per capita than several of its sub-Saharan neighbors. Following a real GDP contract of 1.5% in 2016, the IMF forecasts that growth will reach 0.8% in 2017 and 1.9% in 2018. While growth began to pick up in the first half of 2017, Nigeria still has much work to do. However, there is the sentiment that the economy has turned a corner and has begun to see a silver lining. Devaluation of the naira, rising inflation, the drop in oil revenues, the slowdown in oil production, and the leader softening of growth.

The Politics of Solidarity
Carmen Ludwig, 2020-04-08. Politische Transformation und dann 25 Jahre nach dem Ende der Apartheid sieht sich die s-dafrikanische Gesellschaft nach wie vor mit drastischen Ungleichheiten konfrontiert. Carmen Ludwig nimmt den Wandel öffentlicher Dienstleistungen im Post-Apartheid-S-dafrika und die Auswirkungen der kommunalen Privatisierungen in den Blick. Sie zeigt anhand dreier Gro ßt e politische Konfliktlinien und lokale Gewerkschaftsstrategien im Spannungsfeld von in- und exklusiver Solidarität auf. Zudem stellt sie die Frage, wie es Gewerkschaften gelingen kann, Solidarität in fragmentierten Belegschaften herzustellen.

Inclusive Theory and Practice in Special Education van Rensburg, Henriette, O'Neill, Shirley, 2020-01-03. Inclusive education retains significant complexity associated with creating a definition, and there is significant importance within the surrounding narratives reflecting the broader definitions. Due to the flexibility within the definition, investigating current practices across an array of definitions becomes essential to developing best practices in special education. *Inclusive Theory and Practice in Special Education* is an essential research book that examines current shifts in the field within the overarching philosophy of inclusion and inclusive education. It reports recent research that focuses on the experiences of teachers and students in classrooms and ways of enhancing the practices of inservice teachers and early career teachers as well as the preparation of preservice teachers. Besides presenting research from these perspectives, it also addresses a selection of broader issues that impact on policy and curriculum, thus identifying related concerns including those of the wider community. Highlighting a wide range of topics such as learning disabilities, student mobility, and early childhood education, this publication is ideal for researchers, professionals, administrators, curriculum designers, academicians, policymakers, and students.

The Economics of Defense Industry Thomas-Durell Young, 2023-10-17. This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive, technologically advanced, and that requires a highly skilled labour force. Since the end of the cold war, Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation. In all cases, government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand. The

2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions. Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments. The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis. This book serves as an essential guide for academics, researchers and students interested in defence economics, industrial economics, international relations and industrial policy. The chapters in this book were originally published in various issues of *Defense Security Analysis*. Strengthening Data Science Methods for Department of Defense Personnel and Readiness Missions National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on Applied and Theoretical Statistics, Committee on Strengthening Data Science Methods for Department of Defense Personnel and Readiness Missions, 2017-03-06. The Office of the Under Secretary of Defense Personnel Readiness referred to throughout this report as P R is responsible for the total force management of all Department of Defense DoD components including the recruitment, readiness and retention of personnel. Its work and policies are supported by a number of organizations both within DoD including the Defense Manpower Data Center DMDC and externally including the federally funded research and development centers FFRDCs that work for DoD. P R must be able to answer questions for the Secretary of Defense such as how to recruit people with an aptitude for and interest in various specialties and along particular career tracks and how to assess on an ongoing basis service members career satisfaction and their ability to meet new challenges. P R must also address larger scale questions such as how the current realignment of forces to the Asia Pacific area and other regions will affect recruitment, readiness and retention. While DoD makes use of large scale data and mathematical analysis in intelligence, surveillance, reconnaissance and elsewhere exploiting techniques such as complex network analysis, machine learning, streaming social media analysis and anomaly detection, these skills and capabilities have not been applied as well to the personnel and readiness enterprise. Strengthening Data Science Methods for Department of Defense Personnel and Readiness Missions offers and roadmap and implementation plan for the integration of data analysis in support of decisions within the purview of P R. Anti-Social Media Kevin Foster, 2021-08-31. Over the past decade the gravitational centre of contemporary conflict has shifted from the physical battlefield to the online battlespace where the ingenuity of non state actors has vexed governments and tested their militaries. Devising new architectures of participation, Al Qaeda and ISIS have weaponised social media and empowered their dispersed followers to organise, communicate and dominate the information domain. Kevin Foster shows how conventional militaries in the US, Britain, Israel and Australia have responded to this challenge by integrating social media into their systems and operations and the organisational and cultural impediments they have confronted. Foster traces each military's social media journey appraising the strategies, doctrine and policies developed to regulate its management and use. From the

ADFA Skype sex scandal to the IDF's sophisticated integration of the real and virtual spaces of war Anti Social Media examines the good the bad and the indifferent in the armed forces halting advance towards social media competence
