A Geographical Century Vladimir Kolosov, Jacobo García-Álvarez, Michael Heffernan, Bruno Schelhaas, 2022-05-31 This volume of specially commissioned interpretative essays marks the centenary of the establishment of the International Geographical Union in 1922. Written by leading human and physical geographers from all parts of the world, *A Geographical Century* considers the history and present condition of geography as an international science. Based on the latest research, *A Geographical Century* provides new and critical analyses of the different forms of geographical internationalism that emerged during the 20th century, the changing relations between geography and cognate disciplines in the natural and social sciences, the geopolitics of international geographical collaboration, and the prospects of geography as a 21st-century international science.

Introducing Human Geographies Kelly Dombroski, Mark Goodwin, Junxi Qian, Andrew Williams, Paul Cloke, 2024-07-09 *Introducing Human Geographies* is a travel guide into the academic subject of human geography and the things that it studies. The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography. This updated and much extended fourth edition includes a diverse range of authors and topics from across the globe with a completely revised set of contributions reflecting contemporary concerns in human geography. Presented in four parts with a streamlined structure, it includes over 70 contributions written by expert international researchers addressing the central ideas through which human geographers understand and shape their subject. It maps out the big foundational ideas that have shaped the discipline past and present, explores key research themes being pursued in human geography's various sub-disciplines, and identifies emerging collaborations between human geography and other disciplines in the areas of technology, justice, and environment. This comprehensive, stimulating, and cutting-edge introduction to the field is richly illustrated throughout with full-colour figures, maps, and photos. The book is designed especially for students new to university degree courses in human geography across the world and is an essential reference for undergraduate students on courses related to society, place, culture, and space.
