Mathematical Foundations of Computer Science 2003 Branislav Rován,Peter Vojtas,2003-12-03 This book constitutes the refereed proceedings of the 28th International Symposium on Mathematical Foundations of Computer Science MFCS 2003 held in Bratislava Slovakia in August 2003 The 55 revised full papers presented together with 7 invited papers were carefully reviewed and selected from 137 submissions All current aspects in theoretical computer science are addressed ranging from discrete mathematics combinatorial optimization graph theory networking algorithms and complexity to programming theory formal methods and mathematical logic **An Illustrated Introduction to Topology and Homotopy** Sasho Kalajdzievski,2015-03-24 An Illustrated Introduction to Topology and Homotopy explores the beauty of topology and homotopy theory in a direct and engaging manner while illustrating the power of the theory through many often surprising applications This self contained book takes a visual and rigorous approach that incorporates both extensive illustrations and full proofs **Book Catalog of the Library and Information Services Division: Shelf list catalog** Environmental Science Information Center. Library and Information Services Division,1977 *ESOP '88* Harald Ganzinger,1988-03-09 The volume contains the 23 papers selected for presentation at the ESOP 88 Conference Nancy 1988

The theme of the ESOP conferences is the design specification and implementation of programming languages and systems. Particular emphasis is placed on work in which an implemented system embodies an important concept or formal model of programming in such a way that its usefulness is demonstrated. Among the five sections of the volume the one on language implementation contains the most papers. Here a rather wide spectrum of aspects ranging from language implementation problems on parallel architectures and optimization of functional programs to new concepts for programming environments is covered. Another large section consists of papers in the area of algebraic specification and type concepts. The papers in this section are devoted to issues such as polymorphism subtypes and notions of implementation and reuse for algebraic specifications. Two further sections are devoted to new language concepts and novel approaches to program development and verification.
