Partially Specified Matrices and Operators: Classification, Completion, Applications Israel Gohberg, Marinus Kaashoek, Frederik Van Schagen, 2012-12-06 This book is devoted to a new direction in linear algebra and operator theory that deals with the invariants of partially specified matrices and operators and with the spectral analysis of their completions The theory developed centers around two major problems concerning matrices of which part of the entries are given and the others are unspecified The first is a classification problem and aims at a simplification of the given part with the help of

admissible similarities The results here may be seen as a far reaching generalization of the Jordan canonical form The second problem is called the eigenvalue completion problem and asks to describe all possible eigenvalues and their multiplicities of the matrices which one obtains by filling in the unspecified entries Both problems are also considered in an infinite dimensional operator framework A large part of the book deals with applications to matrix theory and analysis namely to stabilization problems in mathematical system theory to problems of Wiener Hopf factorization and interpolation for matrix polynomials and rational matrix functions to the Kronecker structure theory of linear pencils and to non everywhere defined operators The eigenvalue completion problem has a natural associated inverse which appears as a restriction problem The analysis of these two problems is often simpler when a solution of the corresponding classification problem is available

SIAM Journal on Matrix Analysis and Applications ,1991 Contains research articles on linear algebra with emphasis on applications and numerical procedures These applications include such areas as Markov chains networks signal processing systems and control theory mathematical programming economic and biological modeling and statistics and operations research E-math li Tm' 2007 Ed.(intermediate Algebra) , **The Algebra Teacher's Activity-a-Day, Grades 6-12** Frances McBroom Thompson, Ed.D.,2010-05-05 Fun filled math problems that put the emphasis on problem solving strategies and reasoning The Algebra Teacher s Activity a Day offers activities for test prep warm ups down time homework or just for fun These unique activities are correlated with national math education standards and emphasize problem solving strategies and logical reasoning skills In many of the activities students are encouraged to communicate their different approaches to other students in the class Filled with dozens of quick and fun algebra activities that can be used inside and outside the classroom Designed to help students practice problem solving and algebra skills The activities address a wide range of topics skills and ability levels so teachers can choose whichever best suit the students needs
