Measuring Up Daniel M Koretz, 2009-06-30 *Measuring Up* demystifies educational testing from MCAS to SAT to WAIS Bringing statistical terms down to earth Koretz takes readers through the most fundamental issues that arise in educational testing and shows how they apply to some of the most controversial issues in education today from high stakes testing to special education

Measuring Up Arie L. Nettles, Michael T. Nettles, 2012-12-06 *Measuring Up* revisits vital issues of equity and assessment through the research efforts and insights of many of the nation's most prominent educators and assessment experts As its most urgent purpose the publication aims to sensitize readers to the unfairness and inappropriate uses of testing instruments which under optimal circumstances have the potential to benefit all students With America fervently espousing both national and state testing the differential performance by race and social class raises the specter of tests as barriers to life milestones such as promotion graduation and college admissions In response to such punitive testing the papers included here explore a host of models and practices that are currently being piloted both in America and abroad as educators grapple with the effects the assessment is having on minority and disadvantaged students and school systems In the process outcomes of innovative portfolio and authentic assessments are weighed against important standards and principles of validity and consequences As the various authors probe the gap between African American and White test scores they raise important questions of resources family background and educational opportunity Beyond their value of their recommendations to educators their papers help to identify causes of pupil deficiencies in ways that can be addressed by policymakers To reinforce the emphasis on equity several authors present a definitive defense of affirmative action as a critical counter measure to the lack of fairness in school quality family and social supports and educational resources

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these
