

Algebra Board Game

First cut the board game template you would like to use. There are two to choose from, one with equations on the board already and one with blank space.

If you choose the blank board game template, think up your own simple equations using + or $\times$ and letter and the.

Write an expression like these in each pentagon:

5×3	8×2	6×4	7×5
--------------	--------------	--------------	--------------

The board needs to use algebra in every pentagon, the right and possibly pentagons like these:

Back 3 spaces	Miss a go	Return to start	Roll dice and go back that many
---------------	-----------	-----------------	---------------------------------

Rules of Play

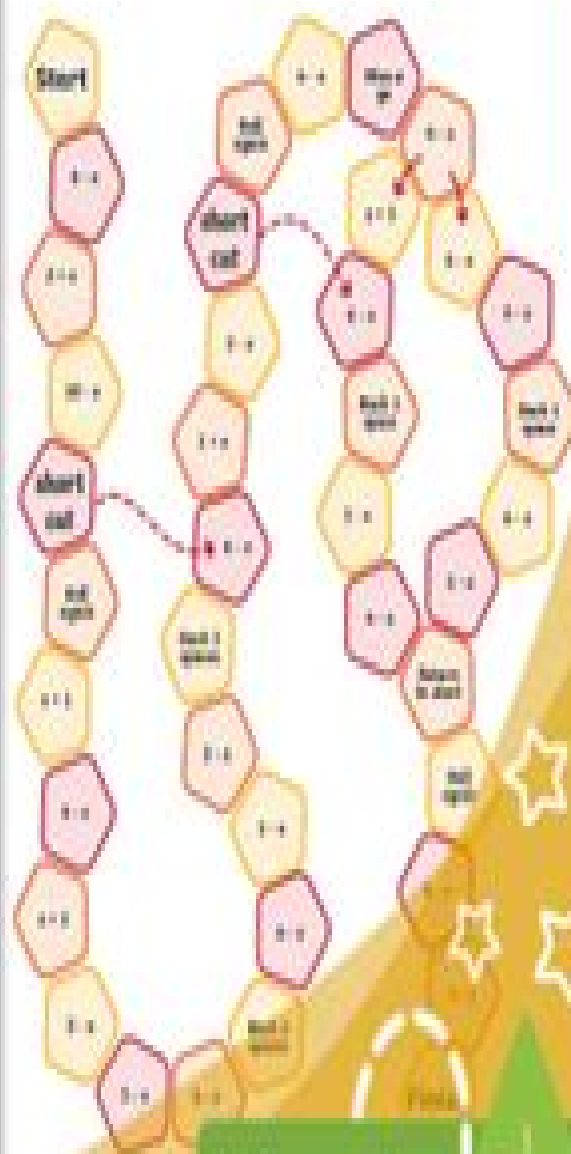

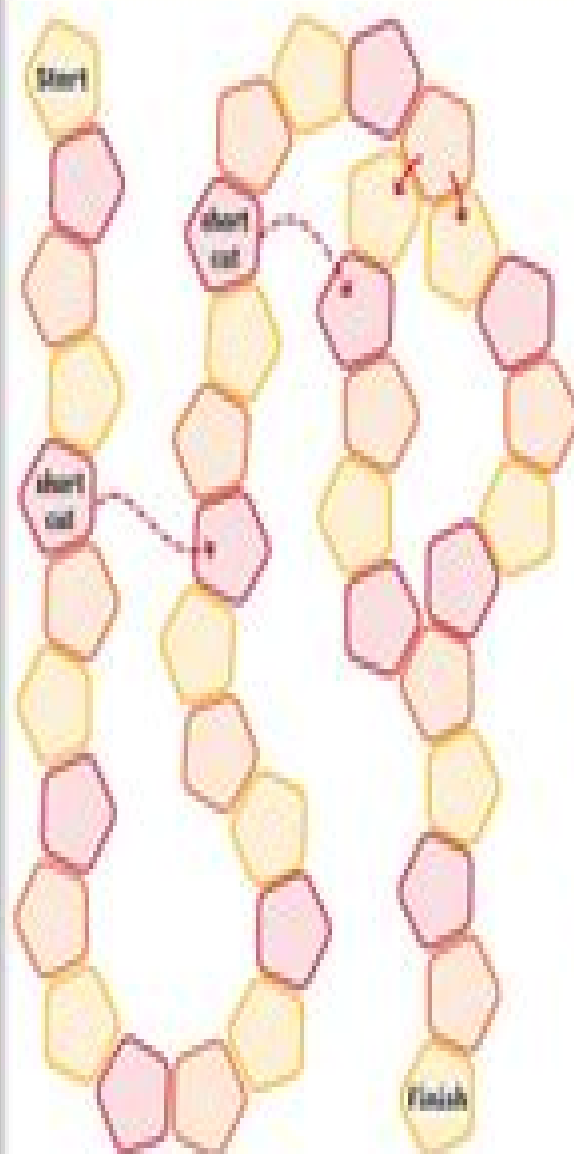

1. Every player has a different colour and number.
2. All numbers begin at the Start.
3. Roll the dice and move forward that number.
4. All players do the same.
5. When it's your turn again, roll the dice.
6. If the game takes to the number on the dice, it's your turn to move.
7. When forward that number of spaces.
8. If your number is negative, go back that many spaces.
9. When players reach their own number.
10. First player past the finish wins.
11. Every player will complete a through.

How to make the board game

- Don't use dice in your pentagons to go roll and go with directed money, which don't work.
- Don't use too many large numbers, as the game will be too slow and frustrating.

Collage

Make your own board game template. Why not have some 'get a roll' square? Players might have to move forward a set number of spaces if they rolled a set number of the same roll.
