

Putting It Together IV

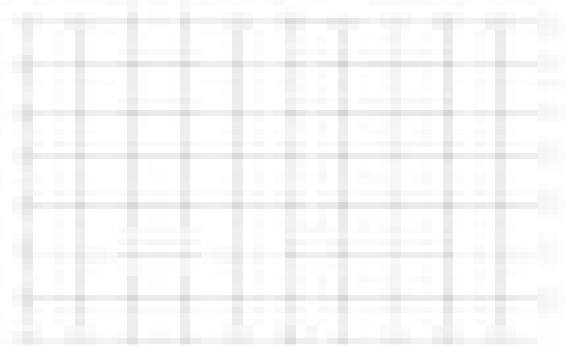

After taking a previously-unpublished, before-announced, test in your system for its under-optimized system. For example, on Wednesday, Kaplan takes a Saturday job involving both independent and dependent. The next day half of the students get another test system (all reg).

Repeat the next day. Kaplan's Saturday test is half of the students in her system have the day before. Repeat this pattern every day before and graph the independent relationships.

15. Table of Data

Number of Days (before Wednesday)	reg of Students (in Kaplan's system)
0	120
1	120
2	
3	
4	
5	
6	
7	

16. Graph of Data

17. What are the independent and dependent variables in the problem situation?

18. What are the domain and range of the problem situation?

19. Is the graph of the data increasing, decreasing?
