Algebra 1 Know It Notebook:

Ramanujan's Notebooks Bruce C. Berndt, 2012-12-06 During the years 1903-1914 Ramanujan recorded most of his mathematical discoveries without proofs in notebooks. Although many of his results had already been published by others, most had not. Almost a decade after Ramanujan's death in 1920, G. N. Watson and B. M. Wilson began to edit Ramanujan's notebooks, but despite devoting over ten years to this project, they never completed their task. An unedited photostat edition of the notebooks was published by the Tata Institute of Fundamental Research in Bombay in 1957. This book is the fifth and final volume devoted to the editing of Ramanujan's notebooks. Parts I-III published respectively in 1985, 1989, and 1991 contain accounts of Chapters 1-21 in the second notebook, a revised enlarged edition of the first, Part IV published in 1994 contains results from the 100 unorganized pages in the second notebook and the 33 unorganized pages comprising the third notebook. Also examined in Part IV are the 16 organized chapters in the first notebook which contain very little that is not found in the second notebook. In this fifth volume, we examine the remaining contents from the 133 unorganized pages in the second and third notebooks and the claims in the 198 unorganized pages of the first notebook that cannot be found in the succeeding notebooks.
