Exercises Andrea Bandini, Patrizia Gianni, Enrico Sbarra, 2024-07-12 This book provides a first introduction to the fundamental concepts of commutative algebra What sets it apart from other textbooks is the extensive collection of 400 solved exercises providing readers with the opportunity to apply theoretical knowledge to practical problem solving fostering a deeper and more thorough understanding of the subject The topics presented here are not commonly found in a single text Consequently the first part presents definitions properties and results crucial for understanding and solving the exercises serving also as a valuable reference The second part contains the exercises and a section titled with True or False questions which serves as a valid self assessment test Considerable effort has been invested in crafting solutions that provide the essential details aiming for a well balanced presentation We intend to guide students systematically through the challenging process of writing mathematical proofs with formal correctness and clarity Our approach is constructive aiming to illustrate concepts by applying them to the analysis of multivariate polynomial rings and modules over a principal ideal domain PID whenever feasible Algorithms for computing these objects facilitate the generation of diverse examples In particular the structure of finitely generated modules over a PID is analyzed using the Smith canonical form of matrices Furthermore various properties of polynomial rings are investigated through the application of Buchberger's Algorithm for computing Gröbner bases This book is intended for advanced undergraduates or master's students assuming only basic knowledge of finite

fields Abelian groups and linear algebra This approach aims to inspire the curiosity of readers and encourages them to find their own proofs while providing detailed solutions to support their learning It also provides students with the necessary tools to pursue more advanced studies in commutative algebra and related subjects **Information Technology**
