**Mathematical Book Histories** Philip Beeley, Ciarán Mac an Bhaird, 2024-08-12 This book both articulates and responds  
to increasing scholarly interest in the materiality of the book Taking as its base the unique collection of mathematical books  
in the Russell Library at Maynooth it addresses questions related to printing techniques and print culture book production  
provenance and reading practices It considers the histories of individual items of the Russell Collection their previous  
locations and owners and explores ways in which annotations underlinings hand drawn diagrams and the like reveal patterns  
of reading and usage Finally it seeks to elicit more information on a previously under researched topic the historical role of  
mathematics in the extensive network of Irish colleges that once covered Catholic Europe located in places such as  
Salamanca Rome Douai and Prague Alongside delivering important new insights into print culture as a medium for  
transmitting scientific ideas *Mathematical Book Histories* is thus also intended to contribute to a broader understanding of  
the role and significance of mathematics in the context of clerical instruction and more broadly in the academic tradition of  
Ireland up to the beginning of the twentieth century Many of the volumes in the Russell Library reflect the remarkably rich  
book trade that flourished in seventeenth and early eighteenth century Dublin and which was quite distinct from that in  
London Booksellers often bought in their wares directly from abroad with the result that publications could enter collections  
that did not enter the purview of contemporary English or Scottish scholars in Britain **CLEP® General Exams Book +
