Nature Unbound Randy T Simmons, Ryan M. Yonk, Kenneth J. Sim, 2016-03-01 What if what we think we know about ecology and environmental policy is just wrong What if environmental laws often make things worse What if the very idea of nature has been hijacked by politics What if wilderness is something we create in our minds as opposed to being an actual description of nature In 1934 former U S Forest Service official Aldo Leopold a godfather to the modern environmental movement wrote that restrictive laws had largely failed in their mission to conserve America s forests rivers and other natural resources Less than forty years later however as various events pushed environmental concerns into the public spotlight lawmakers from both parties championed legislation far more sweeping and restrictive than any Leopold had witnessed How well did these restrictive laws work to right environmental wrongs Why did so many miss the mark And how should we go about improving our policies In *Nature Unbound* authors Randy Simmons Ryan M Yonk and Kenneth J Sim offer a devastating critique of federal environmental policy by scrutinizing it through the lenses of biological ecology and political ecology This powerful framework they show reveals that environmental policy has been guided since the late 1960s by demonstrably false assumptions responsible for a host of ineffective or wasteful command and control policies on air pollution water pollution endangered species wilderness renewable energy and more The mistakes have also empowered political entrepreneurship in ways that have encroached on property rights burdened the general public and degraded the

civic landscape More than a critique of false assumptions and flawed policies Nature Unbound offers bold principles to help us rethink environmental objectives align incentives with goals and affirm the notion that human beings are an integral part of the natural order and merit no less consideration than Earth's other treasures Ultimately nothing less can succeed in our efforts to restore natural resources and revitalize our social and political ecosystem *Cape Coral Burrowing Owls Don't*

Rozelle, 2016-11-08 A study of the natural world as imagined by contemporary writers specifically their portrayals of nature as monster In *Zombiescapes and Phantom Zones* Ecocriticism and the Liminal from *Invisible Man* to *The Walking Dead* Lee Rozelle chronicles the weirdest ugliest and most mixed up characters to appear on the literary scene since World War II creatures intimately linked to damaged habitats that rise from the muck not to destroy or rule the world but to save it The book asks what happens to these landscapes after the madness havoc and destruction What monsters and magic surface then Rozelle argues that zombiescapes and phantom zones depicted in the book become catalysts for environmental reanimation and sources of hope Liminality offers exciting and useful new ways to conceptualize places that have historically proven troublesome unwieldy or hard to define Zombiescapes can reduce the effects of pollution promote environmental justice lessen economic disparity and localize food production The grotesques that ooze and crawl from these passages challenge readers to consider new ways to re-inhabit broken lands at a time when energy efficiency fracking climate change the Pacific trade agreement local food production and sustainability shape the intellectual landscape Rozelle focuses on literary works from 1950 to 2015 the zombiescapes and monsterscapes of post World War II literature that portray in troubling and often devastating ways the brownfields that have been divested of much of their biodiversity and ecological viability However he also highlights how these literary works suggest a new life and new potential for such environments With an unlikely focus on places of ruination and an application of interdisciplinary transnational approaches to a range of fields and texts Rozelle advances the notion that places of distortion might become a nexus where revelation and advocacy are possible again *Zombiescapes and Phantom Zones* has much to offer to various fields of scholarship including literary studies ecocriticism and environmental studies Research academic and undergraduate audiences will be captivated by Rozelle's lively prose and unique anthropological ecocritical and literary analyses **Preserving the Living Earth** Christine Petersen, 2012-01-15

Provides comprehensive information on Earth's various ecosystems their importance and the environmental threats place upon them Conservation in the Anthropocene Fred Van Dyke, 2025-03-06 This book provides a critical assessment of conservation in the Anthropocene grounded in the personal historical and cultural development of human interaction with nature The author argues that conservation can no longer be primarily about preserving nature but must adapt its efforts to promote changes through which humans create a landscape that is neither abandoned nor degraded but used well by humans and non humans alike The book first reviews the origin of ideas and conditions that have led to the concept and classification of the Anthropocene and explores how the author's own interactions with nature were shaped through his experience as a conservation biologist Next it considers how humans have come to be the primary drivers of ecological activity geological events and climate change Chapters then focus on the need for new conservation thinking regarding novel ecosystems urban conservation the role of Indigenous Peoples in conservation and the value of protected areas PAs parks and wilderness The book concludes by identifying strategies for effective conservation and argues for a new formulation of conservation values that redefine human relationships and interaction with nature Chapters are enlivened by the personal experiences of the author and the first person narratives of conservation activists and scientists throughout the world who are learning to practice and succeed in conservation efforts under Anthropogenic conditions Drawing on global examples this book will be of great value to students and scholars of biodiversity conservation and environmental science ready to consider a new way of looking at the care and nurture of nature in the Anthropocene **Swarm, Evolutionary, and Memetic**
