CliffsNotes AP Environmental Science with CD-ROM Jennifer Sutton, Kevin Bryan, 2012-10-11 Proven test taking strategies Focused reviews of all exam areas 5 full length practice exams **Personality and Temperament in Nonhuman Primates** Alexander Weiss, James E.

King, Lindsay Murray, 2011-08-10 Recently there has been an increased interest in research on personality temperament and behavioral syndromes henceforth to be referred to as personality in nonhuman primates and other animals This follows in part from a general interest in the subject matter and the realization that individual differences once consigned to error terms in statistical analyses are potentially important predictors moderators and mediators of a wide variety of outcomes

ranging from the results of experiments to health to enrichment programs Unfortunately while there is a burgeoning interest in the subject matter findings have been reported in a diverse number of journals and most of the methodological and statistical approaches were developed in research on human personality The proposed volume seeks to gather submissions from a variety of specialists in research on individual differences in primate temperament personality or behavioral syndromes We anticipate that chapters will cover several areas The first part of this edited volume will focus on methodological considerations including the advantages and disadvantages of different means of assessing these constructs in primates and introduce some statistical approaches that have typically been the domain of human personality research Another part of this edited volume will focus on present findings including the physiological and genetic bases of personality dimensions in primates the relationship between personality and age how personality may moderate or impact various outcomes including behavior health and well being in captive and non captive environments For the third part of the volume we hope to obtain summaries of the existing work of the authors on the evolutionary importance of personality dimensions and guideposts for future directions in this new and exciting area of research

This volume gathers contributions from scholars from a variety of disciplines to provide a comprehensive assessment of the importance of dogs through history There is a focus on the necessity of an interdisciplinary perspective to fully understand the fundamental role that dogs have played in our past Infrastructure Development and Ape Conservation Helga

Rainer, Arcus Foundation, 2018-11-08 Presents an objective rigorous analysis of relevant issues along with case studies to examine the interface between ape conservation and infrastructure development This title is also available as Open Access via Cambridge Core The Evolution of Childhood Melvin Konner, 2011-11-30 This book is an intellectual tour de force a

comprehensive Darwinian interpretation of human development Looking at the entire range of human evolutionary history Melvin Konner tells the compelling and complex story of how cross cultural and universal characteristics of our growth from infancy to adolescence became rooted in genetically inherited characteristics of the human brain All study of our evolution starts with one simple truth human beings take an extraordinarily long time to grow up What does this extended period of dependency have to do with human brain growth and social interactions And why is play a sign of cognitive complexity and a spur for cultural evolution As Konner explores these questions and topics ranging from bipedal walking to incest taboos he firmly lays the foundations of psychology in biology As his book eloquently explains human learning and the greatest human intellectual accomplishments are rooted in our inherited capacity for attachments to each other In our love of those we learn from we find our way as individuals and as a species Never before has this intersection of the biology and psychology of childhood been so brilliantly described Nothing in biology makes sense except in the light of evolution wrote Dobzhansky In this remarkable book Melvin Konner shows that nothing in childhood makes sense except in the light of evolution UP
