Aging and Development Peter G. Coleman, Ann O'Hanlon, 2017-02-03 The psychology of aging usually focuses upon cognitive changes with a particular focus on dementia and other forms of cognitive decline But getting older is about more than simply changes to the brain and related health issues Changes to our social and emotional lives are also hugely significant as we adapt across our lifespan The second edition of *Aging and Development* is the only textbook available that responds to the growing interest in social personal and emotional development in older age Ideally suited to complement texts on cognitive change the book provides a holistic developmental perspective on aging It highlights a range of issues including the development of personal meaning and spirituality improvements in emotional control uses of reminiscence and life review the importance of healthy attitudes to aging as well as the maintenance of close personal relationships It does not avoid the difficult issues of late life decline but illustrates how even in circumstances of physical and mental frailty a positive sense of self can be created and enhanced Fully updated to provide the most cutting edge overview on this burgeoning topic of interest *Aging and Development* includes a glossary and list of useful websites both on the study of gerontology and the psychology of aging It will be essential reading for all students of developmental psychology as well as anyone either training to work or already working with older people

Karl Popper, Science and Enlightenment Nicholas Maxwell, 2017-09-26 Here is an idea that just might save the world It is that science properly understood provides us with the methodological key to the salvation of humanity A version of this idea can be found in the works of Karl Popper Famously

Popper argued that science cannot verify theories but can only refute them and this is how science makes progress Scientists are forced to think up something better and it is this according to Popper that drives science forward But Nicholas Maxwell finds a flaw in this line of argument Physicists only ever accept theories that are unified theories that depict the same laws applying to the range of phenomena to which the theory applies even though many other empirically more successful disunified theories are always available This means that science makes a questionable assumption about the universe namely that all disunified theories are false Without some such presupposition as this the whole empirical method of science breaks down By proposing a new conception of scientific methodology which can be applied to all worthwhile human endeavours with problematic aims Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better more civilized and enlightened world

living tissues and organisms **Arctic Mineral Resources** Sergey V. Krivovichev, 2019-04-23 The Arctic zone of the Earth is a major source of mineral and other natural resources for the future development of science and technology. It contains a large supply of strategic mineral deposits including rare earths, copper, phosphorus, niobium, platinum group elements and other critical metals. The continued melting of the sea ice due to climate change makes these resources more accessible than ever before. However, the mineral exploration in the Arctic has always been a challenge due to the climatic restrictions, remote location and vulnerability of Arctic ecosystems. This book covers a broad range of topics related to the problem of Arctic mineral resources including geological, geochemical and mineralogical aspects of their occurrence and formation, chemical technologies and environmental and economic problems related to mineral exploration. The contributions can be tentatively classified into four major types: geodynamics and metallogeny, mineralogy and petrology, mineralogy and crystallography, and mining and chemical technologies associated with the exploration of mineral deposits and the use of raw materials for manufacturing new products. The book can be of interest for all those interested in Arctic issues and especially in Arctic mineral resources and associated problems of mineralogy, geology, geochemistry and technology.
