David Day

14 November Paper 1 Geography Memo:

Antarctica David Day, 2013-06-03 Since the first sailing ships spied the Antarctic coastline in 1820 the frozen continent has captured the world's imagination David Day's brilliant biography of Antarctica describes in fascinating detail every aspect of this vast land's history two centuries of exploration scientific investigation and contentious geopolitics

Proceedings of the Royal Geographical Society and Monthly Record of Geography Royal Geographical Society (Great Britain), 1864 **The United States and the End of British Colonial Rule in Africa, 1941-1968** James P. Hubbard, 2014-01-10 At the end of World War II Britain possessed a vast African empire encompassing nearly 27 million square miles about 10 times larger than Britain itself But by 1965 only three small African territories remained under British control all of which would become independent before the end of 1968 This book examines the swift demise of Britain's African empire looking particularly at the role played by the United States in bringing the empire to an end It reveals how the United States was anti colonial without being actively pro independence concluding that the country's policies and actions combined with its postwar dominance directly and indirectly contributed to the political economic and social transformation of Africa **The Athenaeum**, 1853 Exhibiting Madness in Museums Catharine Coleborne, Dolly MacKinnon, 2012-06-12 This innovative collection of essays offers a comparative history of independent and institutional collections of psychiatric objects in Australia New Zealand Canada and the United Kingdom Leading scholars in the field investigate collectors' collections their display and the reactions to exhibitions of the history of insanity *Awful Splendour* Stephen J. Pyne, 2011-11-01 Fire is a defining element in Canadian land and life With few exceptions Canada's forests and prairies have evolved with fire Its peoples have exploited fire and sought to protect themselves from its excesses and since Confederation the country has devised various institutions to connect fire and society The choices Canadians have made says a great deal about their national character *Awful Splendour* narrates the history of this grand saga It will interest geographers historians and members of the fire community **Commerce Today**, 1972 **Practical Radicalism and the Great Migration** Thomas Aiello, 2023-02-15 This book's predecessor *The Grapevine of the Black South* emphasized the owners of the Atlanta Daily World and its operation of the Scott Newspaper Syndicate between 1931 and 1955 In a pragmatic effort to avoid racial confrontation developing from white fear newspaper editors developed a practical radicalism that argued on the fringes of racial hegemony saving their loudest vitriol for tyranny that was not local and thus left no stake in the game for would be white saboteurs Thomas Aiello reexamined historical thinking about the Depression era Black South the information flow of the Great Migration the place of southern newspapers in the historiography of Black journalism and even the ideological and philosophical underpinnings of the civil rights movement With *Practical Radicalism and the Great Migration* Aiello continues that analysis by tracing the development and trajectory of the individual newspapers of the Syndicate evaluating those with surviving issues and presenting them as they existed in proximity to their Atlanta hub In so

doing he emphasizes the thread of practical radicalism that ran through Syndicate editorial policy Practical Radicalism and the Great Migration is a supplement to The Grapevine of the Black South providing a fuller picture of the Scott Newspaper Syndicate and the Black press in the 1930s 1940s and 1950s **Small, Gritty, and Green** Catherine Tumber, 2013-09-13

How small to midsize Rust Belt cities can play a crucial role in a low carbon sustainable and relocalized future America's once vibrant small to midsize cities Syracuse Worcester Akron Flint Rockford and others increasingly resemble urban wastelands Gutted by deindustrialization outsourcing and middle class flight disproportionately devastated by metro freeway systems that laid waste to the urban fabric and displaced the working poor small industrial cities seem to be part of America's past not its future And yet Catherine Tumber argues in this provocative book America's gritty Rust Belt cities could play a central role in a greener low carbon relocalized future As we wean ourselves from fossil fuels and realize the environmental costs of suburban sprawl we will see that small cities offer many assets for sustainable living not shared by their big city or small town counterparts including population density and nearby fertile farmland available for new environmentally friendly uses Tumber traveled to twenty five cities in the Northeast and Midwest from Buffalo to Peoria to Detroit to Rochester interviewing planners city officials and activists and weaving their stories into this exploration of small scale urbanism Smaller cities can be a critical part of a sustainable future and a productive green economy Small Gritty and Green will help us develop the moral and political imagination we need to realize this **Title Announcement Bulletin** , 1957
