2014 June Zimsec Papers:

Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Regime and Education in Zimbabwe Bekithemba Dube, Albert Mufanechiya, 2024-06-10 This collection focuses on the post-independence educational development in Zimbabwe. It shows how the ZANU PF regime has presided over the demise of education and covers a wide range of topics such as violence against teachers, poor salaries, student activism, minority languages, and curriculum innovations. This volume argues that the regime has used education as a tool for repression. Curriculum innovations introduced and implemented in Zimbabwe have little to do with improving the performance of the learners and more to do with stopping teachers from pushing the regime change agenda. Consequently, this has resulted in a nation in crisis, marked with high turnover, poor economy, and mass exodus of teachers and learners. The contributors to this volume make various suggestions which could recenter education towards addressing the experiences of the learners as opposed to being used as a tool to push repression and thwart democracy.

Beyond WEIRD: Psychobiography in Times of Transcultural and Transdisciplinary Perspectives Claude-Hélène Mayer, Roelf van Niekerk, Paul J.P. Fouché, Joseph G. Ponterotto, 2023-05-27 This volume presents psychobiographical research in non-WEIRD Western, Educated, Industrialized, Rich, and Democratic contexts and samples focusing on culture, transcultural, and transdisciplinary work. It creates a platform for researchers, scholars, and scientists from diverse backgrounds to put forth new theoretical and methodological stances in psychobiography, thereby making the field more inclusive, diverse, and equitable. The chapters in this volume investigate the role of context across the life course of non-WEIRD psychological subjects as well as the interplay between them and their environments across the life span. They further elucidate cognitive, affective, and behavioural aspects of individuals with non-WEIRD backgrounds. The volume provides a broad and at the same time in-depth perspective into psychobiography beyond the usual contexts and therefore has new and original learnings to offer across disciplines and cultures. It is a breakthrough in terms of its transcultural and transdisciplinary insights into lives lived in different contexts in the world. Every person is in certain respects like all other persons, but like some other persons, unlike no other persons. This book is a challenging and fascinating exploration of extending psychobiography beyond its origins in Europe and America to women and men of different races and social and economic classes from Africa, Asia, and around the world. At its best, psychobiography can increase people's awareness of their own subjective experience and that of others, contributing to movements for social, cultural, and political change.
