Because We are Standing on the Edge** Stephen Tierney, 2016-10-17 Stephen Tierney has spent thirty years working in schools twenty nine of those in different leadership positions In Liminal Leadership he suggests that the education system is currently at a threshold and it may be one in which the teaching profession is diminished or augmented Using an honest and personal account of Stephen s own journey as a framework Liminal Leadership empowers current and prospective school leaders at all levels to scrutinise polish and advance their skills to build enriching aspirational and ultimately fulfilling cultures within which to work *Knowledge and Networking* Anton Oleinik, 2014-05-31 Success and career growth in academic life depend upon reaching and influencing the widest audience possible To do so scientists strive to develop personalized trust They do so by establishing a large number of connections through networking and also through the strength of their arguments and the validity and reliability of their research To secure increasingly rare tenure positions and achieve salary increases promotions and recognition scholars place themselves on a continuum of priorities ranging from total emphasis on networking to complete focus on advancing knowledge trying to find some middle ground between the two extremes Anton Oleinik argues that when scholars prioritize networking science reproduces features of a small world in which personal connections prevail Who knows whom matters more than who knows what In this scenario one s status derives more from affiliation with a specific group of scholars or a particular university than from contributing to advancing knowledge Acknowledging that it would be a mistake to consider networking the main source of evils in science Oleinik instead criticizes the decisions scholars make while struggling to find that middle ground between networking and advancing knowledge and managing conflicts between these priorities The fierce competition for increasingly scarce research funds and the difficulty of finding jobs in academia underlines the growing importance of the choices made by an academic Though

Oleinik focuses particularly on the social sciences his ideas are just as relevant to other disciplinary areas The Education We Need for a Future We Can't Predict Thomas Hatch, Jordan Corson, Sarah Gerth van den Berg, 2021-01-19 Improve Schools and Transform Education In order for educational systems to change we must reevaluate deep seated beliefs about learning teaching schooling and race that perpetuate inequitable opportunities and outcomes Hatch Corson and Gerth van den Berg challenge the narrative when it comes to the grammar of schooling or the conventional structures practices and beliefs that define educational experiences for so many children to cast a new vision of what school could be The book addresses current systemic problems and solutions as it Highlights global examples of successful school change Describes strategies that improve educational opportunities and performance Explores promising approaches in developing new learning opportunities Outlines conditions for supporting wide scale educational improvement This provocative book approaches education reform by highlighting what works while also demonstrating what can be accomplished if we redefine conventional schools We can make the schools we have more efficient more effective and more equitable all while creating powerful opportunities to support all aspects of students development You won't find a better book on system change in education than this one We learn why schools don't change how they can improve what it takes to change a system and in the final analysis the possibilities of system change Above all The Education We Need renders complexity into clarity as the writing is so clear and compelling A powerful read on a topic of utmost importance Michael Fullan Professor Emeritus OISE University of Toronto I cannot recommend this book highly enough Tom tackles long standing and emerging educational issues in new ways with an impressive understanding of the challenging complexities but also feasible possibilities for ensuring excellence and equity for all students Carol Campbell Associate Professor Ontario Institute for Studies in Education University of Toronto *These 6 Things* Dave Stuart Jr., 2018-06-28 Streamline literacy instruction while increasing student achievement Dave R Stuart Jr's work is centered on a simple belief all students and teachers can flourish Yet that seemingly simple goal can feel unattainable when teachers are expected to teach core content within the disciplines and improve literacy in their classrooms How can teachers and students flourish under so much pressure Stuart's advice Take a deep breath and refocus on six known best practices establish and strengthen key beliefs then build knowledge and increase reading writing speaking and listening and argumentation in every content area every day *These 6 Things* is all about streamlining your practice so that you're teaching smarter not harder and kids are learning doing and flourishing in ELA and content area classrooms In this essential new resource teachers will receive Proven classroom tested advice delivered in an approachable teacher to teacher style that builds confidence Practical strategies for streamlining instruction in order to focus on key beliefs and literacy building activities Solutions and suggestions for the most common teacher and student hang ups Numerous recommendations for deeper reading on key topics In addition to teaching English and world history for more than a decade Stuart is well known for his blog DaveStuartJr.com which has over 35 000 visitors each month This popular resource has been a beacon of light for
