Teaching Online Claire Howell Major,2015-03-15 Demystifies online

teaching for both enthusiastic and wary educators and helps faculty who teach online do their best work as digital instructors. It is difficult to imagine a college class today that does not include some online component whether a simple posting of a syllabus to course management software, the use of social media for communication or a full blown course offering through a MOOC platform. In *Teaching Online*, Claire Howell Major describes for college faculty the changes that accompany use of such technologies and offers real world strategies for surmounting digital teaching challenges. Teaching with these evolving media requires instructors to alter the ways in which they conceive of and do their work according to Major. They must frequently update their knowledge of learning, teaching and media and they need to develop new forms of instruction, revise and reconceptualize classroom materials and refresh their communication patterns. Faculty teaching online must also reconsider the student experience and determine what changes for students ultimately mean for their own work and for their institutions. *Teaching Online* presents instructors with a thoughtful synthesis of educational theory, research and practice as well as a review of strategies for managing the instructional changes involved in teaching online. In addition, this book presents examples of best practices from successful online instructors as well as cutting edge ideas from leading scholars and educational technologists. Faculty members, researchers, instructional designers, students, administrators and policy makers who engage with online learning will find this book an invaluable resource.

Trade Wars Are Class Wars. Matthew C. Klein, Michael Pettis, 2020-05-01. A provocative look at how today's trade conflicts are

caused by governments promoting the interests of elites at the expense of workers Trade disputes are usually understood as conflicts between countries with competing national interests but as Matthew C Klein and Michael Pettis show in this book they are often the unexpected result of domestic political choices to serve the interests of the rich at the expense of workers and ordinary retirees Klein and Pettis trace the origins of today s trade wars to decisions made by politicians and business leaders in China Europe and the United States over the past thirty years Across the world the rich have prospered while workers can no longer afford to buy what they produce have lost their jobs or have been forced into higher levels of debt In this thought provoking challenge to mainstream views the authors provide a cohesive narrative that shows how the class wars of rising inequality are a threat to the global economy and international peace and what we can do about it **State of North Carolina Administrative Code** ,2016
