From Evidence to Action Food and Agriculture Organization of the United Nations, 2018-10-18 Cash transfers have become a key social protection tool in developing countries and have expanded dramatically in the last two decades. However, the impacts of cash transfers programmes, especially in Sub-Saharan Africa, have not been substantially documented. This book presents a detailed overview of the impact evaluations of these programmes carried out by the Transfer Project and FAO's From Protection to Production project. The 14 chapters include a review of eight country case studies: Kenya, Ghana, Ethiopia, Zambia, Zimbabwe, Lesotho, Malawi, and South Africa, as well as a description of the innovative research methodologies, political economy issues, and good practices to design cash transfer programmes. The key objective of the book is to enhance the understanding of these development programmes, how they lead to a broad range of social and productive impacts, and also of the role of programme evaluation in the process of developing policies and implementing programmes. **New**

Perspectives on Managerial and Leadership Psychology Johnson, Rick D., 2021-01-22 The subject of leadership and managerial psychology exists as a sub-branch of psychology within the fields of industrial and organizational psychology. There still appears to be ongoing debate regarding the core pathology for gaining managerial expertise in professional roles relative to having suitable leadership skills and managerial knowledge beyond the direct daily work involved in organizations. Professional organizations inherently include varied levels of sensitive human interactions which further necessitates their management professionals to have leadership styles that are adjustable, contingent on a given situation. Relative to this edited book, managerial psychology is being utilized in a way that may subsequently seek to develop a series of scientific theory principles where the focus is to develop managerial axioms that advance contemporary existing knowledge surrounding professional management logic. The Handbook of Research on Multidisciplinary Perspectives on Managerial and Leadership Psychology provides value uncovered by a collaboration of generalists and specialists who bring professional managerial and leadership opinions to light through narratives and research inclusive of fundamental theory principles that can be applied in practice and academia. This edited reference is focused on the enhancement of management research through managerial psychology while highlighting topics including business process knowledge management in diverse discipline situations and

issues in education provision such as inclusion **Politics, Public Policy and Social Protection in Africa** Nicholas Awortwi, Emmanuel Aiyede, 2017-05-08 Africa is now in a much improved position to support its poor and vulnerable people. It has more money, more policy commitment and abundant intervention programmes. Yet the number of citizens living lives of desperation or at risk of destitution is at an all time high and still rising. What is turning such positive prospects into such a disappointing result? This book reveals key answers drawing on empirical studies of cash transfer programmes in Botswana, Ghana, Kenya, Nigeria and Uganda. The studies uncover the motives of donors, politicians and the poor themselves and why governments are not expanding the donor driven pilot programmes as expected. *The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements* Fatih Bayram, Maki Kubota, Sergio Miguel Pereira Soares, 2024-03-27 Over the past three decades studies investigating heritage speaker (HS) linguistic competencies have shown time and again that despite being L1 or 2L1 native speakers of their home language(s) HS outcomes display variation across a wide spectrum of differences as compared to each other, other types of bilinguals as well as their monolingual peers. Studies have traditionally used mostly behavioral methodologies rooted in adjacent established fields e.g. L1 acquisition, adult L2 acquisition, offering in addition to documenting and describing HS performance important insights for linguistic theory and challenges related to home minority language maintenance, contact, policy and more. A birds eye view makes it clear that the methodologies one uses to tap into HSs linguistic knowledge areas if not more are important than the phenomena under investigation especially in light of how their unique experiences with their heritage and other languages are present across a continuum.
