often struggle with knowledge integration because the task of integrating knowledge across domains from various courses and from practical training is left largely to the individuals. Thus the efficacy and quality of higher education programs particularly in pre service teacher education could be improved through careful attention to knowledge integration.

International Perspectives on Knowledge Integration aims at facilitating the consideration of knowledge integration in teacher training and higher education in both research and practice. Specifically it explores theoretical conceptions and methods and reports on original research and good practices for fostering knowledge integration. It is thus of interest to researchers, faculty board members and lecturers concerned with teacher training and higher education as well as to student teachers and students of pedagogy education and educational psychology.
