Changing the Game Nancy Weiss Malkiel, 2023-11-14 How a visionary university and foundation president tackled some of the thorniest problems facing higher education As provost and then president of Princeton University William G Bowen 1933-2016 took on the biggest and most complex challenges confronting higher education cost disease inclusion affirmative action college access and college completion Later as president of the Andrew W Mellon Foundation he took his vision for higher education and the strategies for accomplishing that vision to a larger arena Along the way he wrote a series of influential books including the widely read *The Shape of the River* coauthored with Derek Bok which documented the success of policies designed to increase racial diversity at elite institutions In *Changing the Game* drawing on deep archival research and hundreds of interviews Nancy Weiss Malkiel argues that Bowen was the most consequential higher education leader of his generation Bowen who became Princeton's president in 1972 at the age of 38 worked to shore up the university's financial stability implement coeducation

and create a more inclusive institution Breaking through the traditional Ivy League demographics of white Protestant and male he embraced equal access in admissions for women and men and actively sought to enroll Black Hispanic and Asian American students To increase the intellectual muscle of the faculty he used targeted recruiting and enforced higher scholarly standards In 1988 Bowen moved on to Mellon where among many other accomplishments he developed digital research tools most notably JSTOR and promoted racial diversity through the Mellon Mays Undergraduate Fellowship

Attacking problems with tenacity insight and deep knowledge Bowen showed the world of higher education how a visionary leader can transform an institution

Frameworks for Integrated Project-Based Instruction in STEM Disciplines Anthony J. Petrosino, Candace Walkington, Denise Ekberg, 2024-01-01 Frameworks for Integrated Project Based Instruction in STEM Disciplines presents an original approach to Science Technology Engineering and Mathematics STEM centric project based instruction We approach project based instruction from an engineering design philosophy and the accountability highlighted in a standards based environment We emphasize a backward design that is initiated by well defined outcomes tied to local state or national standards that provide teachers with a framework guiding students design solving or completion of ill defined tasks In project based STEM classrooms students investigate utilize technological tools construct artifacts participate in debates collaborate and make products to demonstrate what they have learned Features include deep coverage of four topics in PBI scaffolding student driven inquiry driving questions and development of lessons based on national and state standards This focus will ensure a deep understanding by the reader of project based instruction which will allow the reader to create strong and meaningful lesson experiences for their students An emphasis on student driven inquiry will be discussed including the importance of giving students the cognitive tools such as statistical analysis tools they need to research and inquire about the lesson topic A breakdown of what a successful driving question includes will be explained and examples given The book will include strategies for starting the lesson process with ending goals in mind by creating driving questions and breaking down state and national standards This book is strongly rooted in research in the learning sciences about project based instruction but will also be designed to be practically useful to teachers and teacher educators and researchers by bridging research and practice
