Singer, 2012-04-27 Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world All chapters include lesson ideas a sample lesson plan with activity sheets primary source documents and helpful charts graphs photographs and maps High school students responses are woven in throughout Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions Offering an alternative to such pre packaged textbook outlines and materials this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it **Social Studies**

for Secondary Schools Alan J. Singer, 2008-10-26 This popular text advocates an inquiry and activity based view of social studies teaching that respects the points of view of students and teachers Based in practice and experience it offers systematic support and open honest advice for new teachers is conversational not pedantic and provides lots of examples While the structure and most of the topics remain largely the same as before this Third Edition presents new lesson ideas in every chapter especially designed to help new teachers to address learning standards to work in inclusive settings and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project or activity based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre service social studies methods courses this text is also useful for in service training programs as a reference for new social studies teachers and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice World History: Patterns of Interaction McDougal-Littell Publishing Staff, 2004-03 **Teaching Information Literacy Skills to Social Sciences Students and Practitioners** Douglas Cook, Natasha Cooper, 2006 Teaching Information Literacy to Social Sciences Students Practitioners is a second discipline based casebook from ACRL This volume is based on the ACRL Information Literacy Competency Standards and presents cases on learning situations and how they can be analyzed and addressed Also included are descriptions of instruction sessions for each case notes and teaching resources Each case explicitly reflects one or more of the ACRL Information Literacy Standards This practical collection of cases and applications brings a new set of resources to librarians doing instruction in the social sciences Contributors cover such topics as data literacy visual literacy and developmental research skills training Information on teaching undergraduate graduate and international students and how to incorporate information literacy into various social science curricula are also presented The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in

discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all
