International Politics Robert J. Art, Timothy W. Crawford, Robert Jervis, 2023-02-06 International Politics Enduring Concepts and Contemporary Issues has been helping students understand the dynamics of international relations for fifty years. Readings by leading scholars on essential topics illustrate fundamental debates and differing points of view for a comprehensive and engaging overview of the discipline while introducing readers to the major forces shaping the world today. The fourteenth edition continues the book's cornerstone approach of combining foundational theoretical works with recent perspectives on current problems including a wealth of new material spread across each of the book's four parts. The foundational material is organized to highlight the concept of anarchy in international relations and how matters of security, power, military force, international political economy, and strategic interactions influence patterns of cooperation and conflict. In addition to a focus on basic security and strategic problems, the politics of international commerce and challenges facing the global economy, this edition also covers critical contemporary issues including human rights, civil wars, intervention, and peacekeeping, migration, cyber conflict, great power competition, climate change, energy transition, nuclear weapons, pandemic, diplomacy, and changes in the political shape of the system. **Features:** 60 expertly edited readings from scholarly sources with 30 new to this edition. A four-part organization to cover anarchy, the use of force, international political economy, and contemporary issues with an in-depth editor introduction to each Part. An entirely new chapter on the return of great power politics, ever more important after Russia's invasion of Ukraine. Learning objectives and discussion questions to focus student learning.

Diplomatic relations have yet to be established between North Korea, the US, and Japan, while conventional military confrontation has persisted. Pyongyang's nuclear weapons programme has further increased tensions, and the possibility of war has frequently been considered.

African Americans in Global Affairs Michael L. Clemons, 2010-07-13 A long overdue introduction to the multifaceted nature of African American participation in global affairs

Precision-guided Munitions and Human Suffering in War James E. Hickey, 2016-04-08 James Hickey proceeds from the premise that throughout history humans have demonstrated a proclivity for using violence against one another as a means to achieve an end means enabled in many respects by the technologies available at the time Advancing technology has often been a prime enabler of ever increasing levels of violence and attendant human suffering At a few junctures in history however certain technologies

have seemingly provided the armed forces that possess them the ability to fight wars with decreasing levels of violence and suffering. Today precision guided munitions PGMs with their high degree of discrimination and accuracy again hold such promise. This book seeks to answer the question: Do PGMs mitigate suffering in war and have these weapons changed the way decisions regarding war and peace have been made? Answering this question helps us understand possible shifts in emphasis in modern warfare both in terms of methods employed and of the greater concern placed on limiting human suffering during conflict. This book will help students of ethics, just war and military history and senior military and civilian leaders to understand the possible outcomes and wider implications of their strategic choices to use such technology.

It will be a valuable resource for a wide variety of scholars, practitioners and analysts who focus on policy analysis in South Asia. Graduate students and advanced undergraduates studying comparative politics and human security issues in South Asia will find useful perspectives in the volume's fresh focus on including human security as a policy priority.

Iran and Nuclear Weapons Saira Khan, 2009-09-25 This book investigates what is driving Iran's nuclear weapons programme in a less hostile regional environment using a theory of protracted conflicts to explicate proliferation. Iran's nuclear weapons program has alarmed the international community since the 1990s but has come to the forefront of international security concerns since 2000. This book argues that Iran's hostility with the United States remains the major causal factor for its proliferation activities. With the US administration pursuing aggressive foreign policies towards Iran since 2000 the latter's security threat intensified. A society that is split on many important domestic issues remained united on the issue of nuclear weapons acquisition after the US war in Iraq. Consequently Iran became determined in its drive to acquire nuclear weapons and boldly announced its decision to enrich uranium leaving the US in no doubt about its nuclear status. This book underscores the importance of protracted conflicts in proliferation decisions and underpinning this is the assumption that non proliferation may be achieved through the termination of intractable conflicts. The aims of this work are to demonstrate that a state's decision to acquire nuclear weapons depends largely on its engagement in protracted conflicts which shows not only that the presence of nuclear rivals intensifies the nuclear ambition but also that non nuclear status of rival states can promote non proliferation incentives in conflicting states inclined to proliferate. This study will be of great interest to students of Iran, Middle Eastern politics, nuclear proliferation and international relations theory.

Saira Khan is a Research Associate in the McGill University of Montreal Joint Research Group in International Security REGIS.
