provides an evolutionary history of religion beginning with the social lives of our primate ancestors This book makes the case that religion is adaptive that it is essential to morality that childhood imagination provides its raw materials and that it is the very essence of what it means to be human *Supernatural Agents* Ilkka Pyysiainen, 2009-04-27 The cognitive science of religion is a rapidly growing field whose practitioners apply insights from advances in cognitive science in order to provide a better understanding of religious impulses beliefs and behaviors In this book Ilkka Pyysiainen shows how this methodology can profitably be used in the comparative study of beliefs about superhuman agents He begins by developing a theoretical outline of the basic modular architecture of the human mind and especially the human capacity to understand agency He then goes on to discuss examples of supernatural agency in detail arguing that the human ability to attribute beliefs and desires to others forms the basis of conceptions of supernatural agents and of such social cognition in which supernatural agents are postulated as interested parties in social life Beliefs about supernatural agency are natural says Pyysiainen in the sense that such concepts are used in an intuitive and automatic fashion Two dots and a straight line below them automatically trigger the idea of a face for example Given that the mind consists of a host of such modular mechanisms certain kinds of beliefs will always have a selective advantage over others Abstract theological concepts are usually elaborate versions of such simpler and more contagious folk conceptions Pyysiainen uses ethnographical and survey materials as well as doctrinal treatises to show that there are certain recurrent patterns in beliefs about supernatural agents both at the level of folk religion and of formal theology *Supernatural as Natural* Michael Winkelman, John R. Baker, 2015-09-04 This book provides a general introduction to the biological and evolutionary bases of religion and is suitable for introductory level courses in the anthropology and psychology of religion and comparative religion Why did human ancestors everywhere adopt religious beliefs and customs The presence and persistence of many religious features across the globe and time suggests that it is natural for humans to believe in the supernatural In this new text the authors explore both the biological and cultural dimensions of religion and the evolutionary origins of religious features Focusing the New Design Eugene G. A Treatise Concerning Religious Affections, In Three Parts Jonathan Edwards, If You Should Go at Midnight Jeffrey S. Debies-Carl, 2023-04-21 Tonight across America countless people will embark on an adventure They will prowl among overgrown headstones in forgotten graveyards stalk through darkened woods and wildlands and creep down the crumbling corridors of abandoned buildings They have set forth in search of a profound paranormal experience and may seem to achieve just that They are part of the growing cultural phenomenon called legend tripping In If You Should Go at Midnight Legends and Legend Tripping in America author Jeffrey S Debies Carl guides readers through an exploration of legend tripping drawing on years of scholarship documentary accounts and his own extensive fieldwork Poring over old reports and legends sleeping in haunted inns and trekking through wilderness full of cannibal mutants and strange beasts Debies Carl provides an in depth analysis of this practice that has long fascinated scholars yet remains a mystery to many observers Debies Carl argues that legend trips are important social practices Unlike traditional rites of passage they reflect the modern world revealing both its problems and its virtues In society as well as in legend tripping there is ambiguity conflict crisis of meaning and the substitution of debate for social consensus Conversely both emphasize individual agency and values even in spiritual matters While people still need meaningful and transformative experiences authoritative traditional institutions are less capable of providing them Instead legend trippers voluntarily search for individually meaningful experiences and actively participate in shaping and interpreting those experiences for themselves
