

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Anna Methematics Grade 9 2013 Question Paper:

Democratic Evaluation and Democracy Donna Podems, 2017-02-01 Democratic evaluation brings a way of thinking about evaluation's role in society and in particular its role in strengthening social justice. Yet the reality of applying it and what happens when it is applied particularly outside the West is unclear. Set in South Africa, a newly formed democracy in Southern Africa, the book affords an in-depth journey that immerses a reader into the realities of evaluation and its relation to democracy. The book starts with the broader introductory chapters that set the scene for more detailed ones which bring thorough insights into national government, local government, and civil societies' experience of evaluation, democratic evaluation, and their understanding of how it contributes to strengthening democracy or not. A teaching case, the book concludes by providing guiding questions that encourage reflection, discussion, and learning that ultimately aims to inform practice and theory.

Learning, Marginalization, and Improving the Quality of Education in Low-income Countries Daniel A. Wagner, Nathan M. Castillo, Suzanne Grant Lewis, 2022-02-21 Improving learning evidence and outcomes for those most in need in developing countries is at the heart of the United Nations Sustainable Development Goal on Education, SDG4. This timely volume brings together contributions on current empirical research and analysis of emerging trends that focus on improving the quality of education through better policy and practice, particularly for those who need improved learning at the bottom of the pyramid (LBOP). This volume brings together academic research experts, government officials, and field-based practitioners. National and global experts present multiple broad thematic papers ranging from the effects of migration and improving teaching to the potential of educational technologies and better metrics for understanding and financing education. In addition, local experts, practitioners, and policymakers describe their own work on LBOP issues being undertaken in Kenya, India, Mexico, and Ivory Coast. The contributors argue persuasively that learning equity is a moral imperative but also one that will have educational, economic, and social impacts. They further outline how achieving SDG4 will take renewed and persistent effort by stakeholders to use better measurement tools to promote learning achievement among poor and marginalized children. This volume builds on the second international conference on Learning at the Bottom of the Pyramid (LBOP2). It will be an indispensable resource for policymakers, researchers, and government think tanks, as well as any readers interested in the implementation of learning equity across the globe. The first volume, *Learning at the Bottom of the Pyramid (LBOP1)*, may be obtained at <http://www.iiep.unesco.org/en/learning-bottom-pyramid> 4608

New Developments in Statistical Information Theory Based on Entropy and Divergence Measures Leandro Pardo,2019-05-20 This book presents new and original research in Statistical Information Theory based on minimum divergence estimators and test statistics from a theoretical and applied point of view for different statistical problems with special emphasis on efficiency and robustness Divergence statistics based on maximum likelihood estimators as well as Wald s statistics likelihood ratio statistics and Rao s score statistics share several optimum asymptotic properties but are highly non robust in cases of model misspecification under the presence of outlying observations It is well known that a small deviation from the underlying assumptions on the model can have drastic effect on the performance of these classical tests Specifically this book presents a robust version of the classical Wald statistical test for testing simple and composite null hypotheses for general parametric models based on minimum divergence estimators
