Legal Priorities in Air Transport Ruwantissa Abeyratne,2019-05-27 Against the backdrop of enormous technological strides this book argues that the air transport industry must be constantly vigilant in its efforts to employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods In this regard safety and security are of the utmost importance both in terms of safe air navigation and the preservation of human life Although the International Civil Aviation Organization ICAO addresses legal issues through its Legal Committee many emerging issues that urgently require attention lie outside the Committee s purview This book analyzes in detail the items being considered by ICAO s Legal Committee considers the legal nature of ICAO and discusses whether or not ICAO s scope should be extended Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport the book also covers a broad range of key issues outside the parameters set by ICAO such as the need to teach air law to a new generation of aviation professionals combating cyber crime and cyber terrorism the regulation of artificial intelligence traveller identification interference with

Border Management in Transformation Johann Wagner, 2020-11-26. This book looks into the processes of change and renewal of border control and border security and management during the past 30 years after the fall of the Iron Curtain and the immense challenges in nation building in South Eastern Europe after the collapse of former Yugoslavia in relation to strategic security management. The abolition of border controls within the Schengen area and simultaneous introduction of necessary replacement measures was an additional topic. The book provides an insight into which the European Union is competent in the reform and modernisation of state law enforcement agencies for ensuring effective border control, border surveillance and border management in line with the EU *acquis communautaire* and EU standards. In the 21st century along with the process of globalisation a constantly evolving security environment creates new dimensions of threats and challenges to security and stability of transnational nature. This seeks for comprehensive multidimensional collective and well coordinated responses. The European Union, Organization for Security and Co-operation in Europe, United Nations as well as other international organisations are able to really contribute to developing cooperative and coordinated responses to these threats by relying on its broad membership and profound expertise and experience. According to the position of the European Union a modern cost benefit oriented and effective border management system should ensure both open borders as well as maximum of security at the same time. Thus the Union's endeavour is to safeguarding internal security to all member states through preventing transnational threats, combating irregular migration and any forms of cross border crime for ensuring smooth border crossings for legitimate travellers and their belongings, goods and services. That is why the Union's concept of Integrated Border Management has been developed to ensure effective border control and surveillance and cost efficient management of the external borders of the European Union. The Union's policy is and will continue to be developed on the basis of the three main areas in place: common legislation, close operational tactical cooperation and financial solidarity. In addition Integrated Border Management has been confirmed as a priority area for strengthening the cooperation with third countries in the European Commission's strategic security management approach where non EU countries are encouraged as partners to upgrade their border security surveillance and border management systems. The Transnational Dimension of Cyber Crime and Terrorism Seymour E. Goodman, Abraham D. Sofaer, 2013-11-01 In December 1999 more than forty members of government industry and academia assembled at the Hoover Institution to discuss this problem and explore possible countermeasures The Transnational Dimension of Cyber Crime and Terrorism summarizes the conference papers and exchanges addressing pertinent issues in chapters that include a review of the legal initiatives undertaken around the world to combat cyber crime an exploration of the threat to civil aviation analysis of the constitutional legal economic and ethical constraints on use of technology to control cyber crime a discussion of the ways we can achieve security objectives through international cooperation and more Much has been said about the threat posed by worldwide cyber crime but little has been done to protect against it A transnational response sufficient to meet this challenge is an immediate and compelling necessity and this book is a critical first step in that direction
