A Weekly Paper**, 1870 **Practicing Gospel** Edward Farley, 2003-01-01 Practicing Gospel is a collection of four new and eight previously published essays on the subjects of practical theology homiletics and worship Christian education and pastoral care Edward Farley offers a more faithful approach to the tasks of ministry for seminarians and pastors too often tempted to equate pastoral care with popular psychology good preaching with snappy public speaking or Christian education with flashy curriculum By holding theology and practice in an inescapable partnership Farley rightly re focuses the church s life on its proper object and subject a mysterious transforming God **The Problem of Reunion** Leslie Joseph Walker, 1920 **The Only Sacrament Left to Us** Thomas Christian Currie, 2016-06-30 Questions of ecclesiology abound and Karl Barth has been regarded as an unhelpful conversation partner and guide for those who care about ecclesiology and the place of the church in the academic pursuit of theology The Only Sacrament Left to Us recovers Barth s doctrine of the threefold Word of God and shows that it is at the heart of his ecclesiological commitments and that he offers a distinct and robust doctrine of the church worthy to be carried forward into the twenty first century debates about the church s place in God s economy Thomas Christian Currie explores the central role of the threefold Word of God in Barth s theology of the church explains its place in Barth s later doctrine of reconciliation and seeks to engage the field of Barth studies with contemporary ecclesiological questions **The Three Levels of Sustainability** Elena Cavagnaro, George H. Curiel, 2022-08-08 Understanding the complexity of sustainability is crucial for the leadership of business organizations national governments and non governmental organizations This second edition of the bestselling book The Three Levels of Sustainability uses the same interdependent three level and three dimensional framework as the first edition encompassing societal organizational and individual levels to clearly demonstrate

what sustainability means and how to implement it This new edition incorporates important developments in reporting and measuring corporate behaviors the impact of COVID 19 and the UN Sustainable Development Goals More and more societies are becoming aware of their dependence on earth s resources However there is still a deep rooted lack of awareness of the connection between society s ambitions for economic growth earth s limitations and unequal distribution of wealth Prominent institutions and organizations and their leaders rely on the conformable belief that more quantity equals more quality and that more growth equals more development Although some progress has been made since the publication of the first edition the world is increasingly characterized by division rising dissatisfaction and growing inequality between countries communities and people At the same time it is anticipated that global warming will reach a point of no return between 2030 and 2052 The fundamental paradigm shift in the way the development process must be navigated is better served by a holistic and inclusive multilevel and multidimensional approach meant to gradually align the critical institutional and individual factors essential to the pathway toward sustainable development The book has been established as an excellent primer to explain the complex issues around sustainability for postgraduate and undergraduate students as well as busy professionals and those already in management and leadership positions in the private public or non profit sectors

Meditz, 2016-09-12 This is the first published book length treatment on Paul Tillich and Judaism which is a neglected aspect of Tillich s thought It has three compelling features First pivotal biographical details show the importance of Judaism for Tillich and that he ardently opposed anti-Semitism before WWII and after the Holocaust Second Tillich s theological method is examined in key primary sources to

show how he maintains continuity between Judaism and Christianity The primary source analysis includes his 1910 and 1912 dissertations on Schelling the 1933 *The Socialist Decision* the 1952 Berlin lectures on the Jewish Question and his final public lecture on the importance of the history of religion for systematic theology Particular attention is paid to his dialectical and theological history of religion Third Tillich's positive theology of Judaism contrasts sharply with the many complex negative ways in which Judaism is portrayed in Western thought This contributes significantly to our understanding the evolving history of Christian anti Judaism

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
