Out of the Present Crisis Terence T. Burton,2012-05-21 Today organizations have achieved an overall failure rate above 80 percent with Lean Six Sigma Lean Six Sigma and continuous improvement in general This is certainly not due to a shortage of books consultants and other online resources about the methodologies and tools or the success stories of Toyota and others However it is due to a shortage of knowledge and practice about the most critical success factors of improvement leadership sustaining infrastructure behavioral and cultural transformation and now emerging technology These factors produce 90 percent of the success with continuous and sustainable improvement the methodologies and tools represent an irrelevant 10 percent For decades most organizations have focused on this quick and easy irrelevant 10 percent through an
