

Lesson 3.1 -- Using and Interpreting Function Notation

Graphs:

Can represent an equation, function, or relation. The graph of a function is a set of points in a coordinate plane such that no vertical line intersects the graph more than once.

Graphing a function:

Graphing a function means plotting the points that satisfy the function. The graph of a function is a set of points in a coordinate plane such that no vertical line intersects the graph more than once.

Interpreting a function:

Interpreting a function means understanding the meaning of the function in the context of the problem. For example, if a function represents the number of people in a room over time, the function value at a given time represents the number of people in the room at that time.
