designs of the world's priestly and virtually all-male elites. With the general reader in mind, the author has grouped together a series of compact discussions of religion and scripture for cross-cultural comparative reference. Kelly's intent is to facilitate critical analysis of the world's holy writ and in particular to encourage younger, skeptical readers of a secular mind to confront the doctrinal, scriptural, and ritual absurdities of those faiths into which they were born and continue to be indoctrinated.

Frank Bolger Kelly grew up in an Irish Catholic family in the Bronx, New York, matriculated to a noted Jesuit college in New England, and subsequently did time at a prestigious non-sectarian institution of higher learning in the Midwest. It was during his enlightening time at the latter that Kelly first began seriously to question not only his own religious upbringing but the scriptural bases of all the world's major religions. Kelly was quickly convinced that the vast majority of the faithful, the world over, commoners like himself, just might reconsider their religious roots and motivations in a new light if they actually bothered to immerse themselves for a time in their own sacred scriptures rather than merely fake familiarity with them.

Actually to read scripture in all its antiquated, tendentious, sectarian absurdity, Kelly reasoned, is to take a first giant step in renouncing irrational creeds of all kinds. Thus was born *Scoffing at Scripture: A Commoner Reads the World's Holy Writ and Rejects Traditional Religion*, a book from which the author hopes the open-minded reader will draw a secularly pure spiritual sustenance.

[Handbook of Linguistic Annotation](#) Nancy Ide, James Pustejovsky, 2017-06-16 This handbook offers a thorough treatment of the science of linguistic annotation. Leaders in the field guide the reader through the process of modeling, creating an annotation language, building a corpus, and evaluating it for correctness. Essential reading for both computer scientists and linguistic researchers, linguistic annotation is an increasingly important activity in the field of computational linguistics because of its critical role in the development of language models for natural language processing applications. Part one of this book covers all phases of the linguistic annotation process: from annotation scheme design and choice of representation format through both the manual and automatic annotation process, evaluation, and iterative improvement of annotation accuracy. The second part of the book includes case studies of annotation projects across the spectrum of linguistic annotation types, including morpho-syntactic tagging, syntactic analyses, a range of semantic analyses, semantic roles, named entities, sentiment, and opinion, time and event, and spatial analyses, and discourse-level analyses, including discourse structure, co-reference, etc. Each case study addresses the various phases and processes discussed in the chapters of part one.
