Growth – the plant makes new cells so it increases in size.

Reproduction – gametes are made in the flower, which fuse together to produce a zygote; this is sexual reproduction. (Note: If students have not previously studied reproduction, accept an answer that refers simply to reproduction as making more of the same species.)

Excretion – the plant makes oxygen as a waste product of photosynthesis, and loses it from its leaves.

Sensitivity – the plant senses the direction from which light comes, and the stem and leaves grow towards it.

A Laboratory Guide for Cellular and Molecular Plant Biology I. Negrutiu, Gharti, Chhetri, 2013-03-09 This laboratory guide comes at a time when several other method books have already been published in this field Is this one different from the others Yes and no There was no attempt made to be comprehensive Rather data were brought to bear on areas where enough competence has been gathered in our laboratories and to complement recent method books many of which cover extensively various aspects of molecular biology in those matters which appeared to us somewhat neglected There was a constant preoccupation and effort to provide miniaturized procedures that are both simple and time saving Interest was devoted to standardized procedures and culture conditions avoiding dogmas such as those giving excessive importance to sophisticated culture media with endless adjustments for local or personal considerations The key to success is the quality of the plant material serving as a source of cells Consequently

isolation extraction or culture techniques can be simplified and standardized This is symptomatic for our times as it marks the end of a period when methodological matters were frequently above the biological problems The times of methods above all is basically over despite the fact that many of us still believe that say tissue culture is a science per se By presenting a few original techniques we believe that one seriously reduces the empiricism still prevailing in this area of research
