Engineering Chemistry-I (Anna University) M.V. Sureshkumar & P. Anilkumar, Engineering Chemistry I serves as a textbook for the first semester course for I year BE B Tech students of Anna University Chennai. The book is informative and exhaustive to meet the requirements of students who aim to assimilate authentic knowledge for use during engineering course as well as in their careers. The theoretical portions have been explained in simple language, clear style with lot of solved problems and illustrated diagrams. Academic and industrial communities will find this book a valuable resource. **KEY FEATURES** Specifically designed for I year B E students of colleges affiliated to Anna University Chennai. The chapters are presented in simple language. Suitable diagrams for clear understanding of the concepts. The recent developments in the respective fields are included in all the chapters. Comparative tables are presented where ever two similar concepts arise. Many solved problems. Review questions from previous Anna University examinations at the end of each chapter. Physical Chemistry Prof.(Dr.) Prashant Mundeja, Dr. Jyotsna Pandit, Dr. P. Durairaj, Dr. Praveen Singh Gehlot, 2023-03-27. The study of macroscopic and microscopic phenomena throughout chemical systems in terms of the principles, practices and concepts of physics such as motion, energy, force, thermodynamics, time, quantum chemistry, statistical mechanics, analytical dynamics and chemical equilibria is what is referred to as the field of physical chemistry. Physical chemistry is a subfield of analytical chemistry. This book will explain the fundamentals of physical chemistry as well as the phenomena that it studies. The book demonstrates with the help of a limited number of formulae how the field of physical chemistry derives its concepts from the fields of physics, quantum mechanics or mathematics and how these fields have all contributed to our comprehension of the natural world. The theoretical underpinnings of chemistry are laid forth by the discipline of physical chemistry. In physics, it is only able to go as high as its knees but in organic and inorganic chemistry, the other two primary subfields of chemistry, it can reach its head. The book *Physical Chemistry* is often used as a text for students just starting in the field of physical chemistry. The book covers a wide variety of topics including chemical bonding, wave mechanics, molecular spectroscopy, ideal and nonideal gases, the three laws of thermodynamics, thermochemistry and solutions for nonelectrolytes. Further included are the kinetics of gas phase processes, colloids and macromolecules, nuclear chemistry and radiochemistry. **Engineering Chemistry Laboratory Manual** Shirish Kumar KODADI, 2020-08-31. Over the most recent couple of years, the importance of undergraduate technical education has grown amid a huge industrial revolution in our country. More refined and recently discovered super specific topics are being introduced instead of old ones while modifying the course curriculum. In the new course curriculum, more noteworthy accentuation is laid on the basic science subjects and on the need to develop in depth knowledge about the fundamentals of any particular area of academic interest. Keeping all this in mind and utilizing my long experience as a teacher in a technical college under a technical university, I have ventured to write this book titled *Engineering Chemistry Laboratory Manual*. In this book, all experiments are explained as per the JNTU syllabus for the first

year students of B Tech These are supplemented with theoretical explanations followed by procedure description tabulation calculation sample calculation and finally a series of possible viva voce questions and their answers relating to that experiment This book will certainly help all B Tech B E students to do well in their viva voce while completing their experiments cum examinations It will also serve as a textbook in Chemistry practical examinations for any student in the laboratory I sincerely hope that this book will receive full appreciation from both students and teachers
